Partnership for Quality Infrastructure: Investment for Asia’s Future

- Respond to infrastructure demand through collaboration with other countries and international organizations.
- Provide approximately USD 110 billion (about a 30% increase), for “quality infrastructure investment” in Asia over the next 5 years by making full use of Japanese economic cooperation tools, including Official Development Assistance (ODA), as well as by collaborating with strengthened Asia Development Bank (ADB).
- Pursue both “quality” and “quantity” of infrastructure by mobilizing further financial resources and know-how of the private sector.

ADB Lending and Investment
- Increase the lending capacity by up to 50% by integrating ADB’s two accounts (OCR and ADF).
- Consider future capital increase.
- Respond to clients’ needs in a more timely manner, for example by expediting project approval procedure.

JICA’s Assistance for Asia’s Infrastructure
- ODA Loans, Grant, Technical Cooperation
- Increase Japanese ODA Loans for Asia’s Infrastructure by about 25% through increased support for project design and preparation, etc.

Public Investment by the Government
- Public Private Partnership (PPP) Infrastructure Investment that utilizes Private Funding and Know-how

Private Funding
- Consider a new collaboration mechanism between JICA’s Private Sector Investment Finance and ADB for PPP infrastructure investment.
- Support developing countries in providing capital, viability gap funding, and guarantee for PPP projects by offering ODA Loans aimed to encourage PPP.
- Provide Technical Cooperation and Grants.

Immense Demand for Infrastructure
- Life-cycle Cost Saving
- Environmental & Social Considerations and Disaster Risk Reduction
- Debt Sustainability
- Alignment with Development Plan
- Human Resources and Institutional Development

Developing, communicating and promoting internationally Standards regarding “Quality Infrastructure Investment”
- World Bank
- APEC
- ASEAN
- G20
- OECD
- FfD

Intellectual, financial, and diplomatic contribution by utilizing Japan’s knowledge and experience.
