# Annex 2 Referred to in Chapter 3 (Rules of Origin)

## PRODUCT SPECIFIC RULES

# PART 1

# GENERAL NOTES

1. The specific rule or specific set of rules that applies to a particular chapter, heading or subheading of this Annex is set out in column 3 or 4 of the product specific rules set out in this Annex adjacent to the chapter, heading or subheading set out in column 1 of the product specific rules set out in this Annex.

2. When a chapter, heading or subheading is subject to alternative specific rules of origin, the rule will be considered to be met if a good satisfies one of the alternatives.

3. Where a specific rule of origin is defined using the criterion of a change in tariff classification (hereinafter referred to as "CTC" in this Annex), each of the non-originating materials used in the production of the good shall be required to undergo the applicable CTC. A requirement of a CTC shall apply only to non-originating materials.

- 4. For the purposes of this Annex:
  - (a) "chapter" means the first two digits in the tariff classification number under the Harmonized System;
  - (b) "heading" means the first four digits in the tariff classification number under the Harmonized System;

  - (d) "subheading" means the first six digits in the tariff classification number under the Harmonized System.

5. For the purposes of column 3 of the product specific rules set out in this Annex:

- (a) "CC" denotes a change to the chapter, heading or subheading from any other chapter. This means that all non-originating materials used in the production of the good have undergone a CTC at the two-digit level (i.e. a change in chapter) of the Harmonized System;

6. For the purposes of column 4 of the product specific rules set out in this Annex:

(a) "CR" means "Chemical Reaction Origin Rule":

For the purposes of chapters 27 to 40, a "chemical reaction" means a process, including a biochemical process, which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of determining whether a good is an originating good:

- (i) dissolving in water or other solvents;
- (ii) the elimination of solvents including solvent water; or
- (iii) the addition or elimination of water of crystallization.

Any good of chapters 27 to 40 that has undergone a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in the Area of a Party;

#### (b) "D" means "Distillation Rule":

For the purposes of heading 27.10, any good that has undergone one of the following processes of distillation shall be considered to be an originating good, if the process occurred in the Area of a Party:

- (i) "atmospheric distillation" a separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapour then condensed into different liquefied fractions. For example, liquefied petroleum gas, naphtha, gasoline, kerosene, diesel/heating oil, light gas oils, and lubricating oil are produced from petroleum distillation; or
- (ii) "vacuum distillation" distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation. Vacuum distillation is useful for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum. In some refineries, gas oils may be further processed into lubricating oils;
- (c) "P" means "Purification Origin Rule":

For the purposes of chapters 28 to 35, chapter 38, and chapter 39 (except for goods of 2905.43, 2905.44, 2905.45, 2906.11, 2918.14, 2918.15, 2922.42, 2923.20, 2924.29, 2938.90, 2940.00, 3006.92, 3201.90, 33.01, 35.01, 35.02, 35.03, 35.04, 35.05, 3802.10, 3805.90, 3806.30, 3809.10, 38.23, 3824.60, and 38.25), "purification" means a process of reduction or elimination of impurities resulting in the elimination of not less than 80 per cent of the content of existing impurities of a good. Any good of the above mentioned chapters that has undergone purification shall be considered to be an originating good if the purification process occurred in the Area of a Party;

(d) "CPS" means "Change in Particle Size Origin
 Rule":

For the purposes of chapter 39 (except for goods of headings 39.01 to 39.14), "change in particle size" means:

- (i) the deliberate and controlled reduction in particle size of a good, other than by merely crushing (or pressing), resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials; or
- (ii) the deliberate and controlled modification in particle size of a good, other than by merely pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials.

Any good of the above mentioned chapters that has undergone a change in particle size shall be considered to be an originating good if the process occurred in the Area of a Party;

(e) "SM" means "Standards Materials Origin Rule":

For the purposes of chapters 28 to 32, chapter 35 and chapter 38 (except for goods of 2905.43, 2905.44, 2905.45, 2906.11, 2918.14, 2918.15, 2922.42, 2923.20, 2924.29, 2938.90, 2940.00, 3006.92, 3201.90, 35.01, 35.02, 35.03, 35.04, 35.05, 3802.10, 3805.90, 3806.30, 3809.10, 38.23, 3824.60, and 38.25), "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses having precise degrees of purity or proportions which are certified by the manufacturer.

Any good of the above mentioned chapters that is a good produced as a standard material shall be considered to be an originating good if the production process occurred in the Area of a Party; and

### (f) "IS" means "Isomer Separation Origin Rule":

For the purposes of chapters 28 to 32, chapter 35 and chapter 39 (except for goods of 2905.43, 2905.44, 2905.45, 2906.11, 2918.14, 2918.15, 2922.42, 2923.20, 2924.29, 2938.90, 2940.00, 3006.92, 3201.90, 35.01, 35.02, 35.03, 35.04, and 35.05), "isomer separation" means a process of isolation or separation of isomers from mixtures of isomers.

Any good of the above mentioned chapters that has undergone isomer separation shall be considered to be an originating good if the process occurred in the Area of a Party.

7. In determining the origin of a good classified under chapters 61 to 63, materials used in the production of the good which are not classified under chapters 50 to 63 shall be disregarded whether or not they contain textiles.

8. This Annex is based on the Harmonized System as amended on 1 January 2012.
