

Joint Crediting Mechanism (JCM)

- Bilateral carbon crediting mechanism
- Diffusion of low carbon technologies
e.g. • Waste heat recovery in energy-intensive industry
• Energy-saving electricity transmission
- Sustainable development

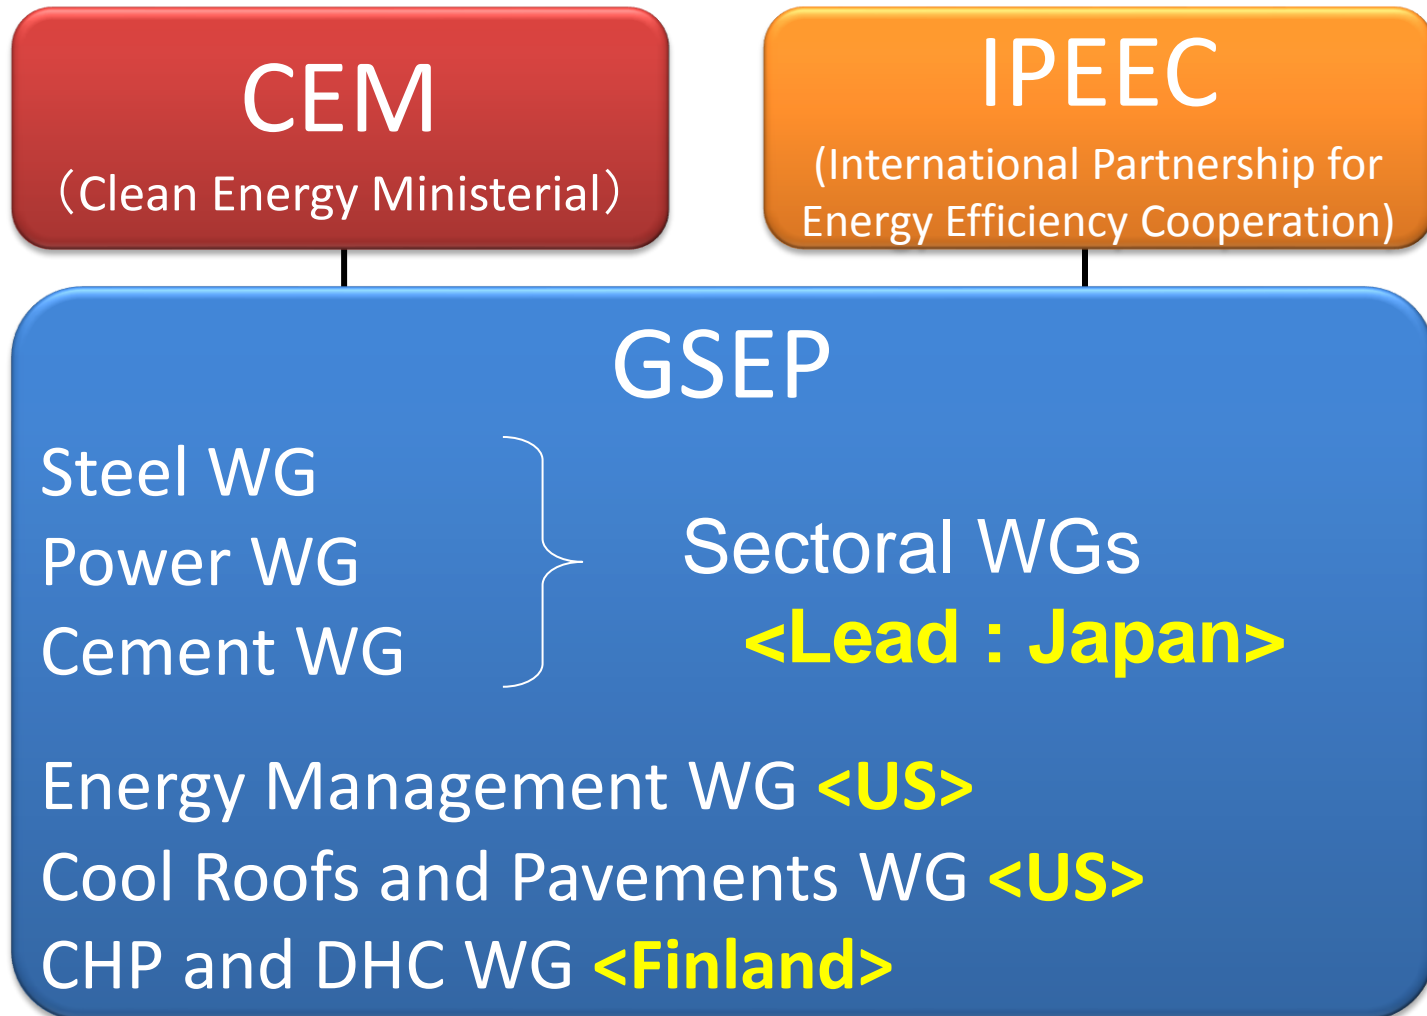

< JCM Host Countries : 12 >

Global Superior Energy Performance Partnership (GSEP)

■ GSEP Sectoral Working Groups contribute to sharing of efficiency-enhancing best practices and technologies within specific sectors in developing countries through public-private partnerships.

■ Japanese government launched an international conference, ICEF, in order to establish a global platform for governments, business and academia to promote innovation in low carbon technologies including their dissemination.

◆The First Annual Conference◆

Date, Venue: October 8th, Tokyo

Opening Video Message
from Prime Minister Shinzo
Abe

Participants: About 800 policymakers, business leaders and researchers from as many as 80 countries and regions participated.

Feedback: There were many positive comments such as “ICEF was very important conference to promote innovations in parallel with the process in UNFCCC.”

ICEF2014 Steering Committee Statement

- Climate change is an urgent and complicated global challenge.
- Innovation will play a key role in addressing climate change.
- The cooperation among policymakers, business leaders and researchers is essential.
- Technological roadmaps are one important tool.
- Dissemination of innovative technologies in developing countries is crucial.
