March 2017
The “2030 Agenda for Sustainable Development” (the 2030 Agenda) is a set of international development goals to be achieved by 2030, which was adopted at a UN summit in September 2015 as a successor to the Millennium Development Goals (MDGs) announced in 2001.

The international community witnessed measurable progress on the MDGs over 15 years. However, the goals on education, maternal and child health, and sanitation remained unachieved, and progress toward their achievement is lagging behind in some regions including sub-Saharan Africa. Over the same period of time, the international environment surrounding development has significantly changed, with new challenges to combat environmental pollution and climate change, and to take countermeasures against frequent natural disasters, as well as the diversification of actors working on development issues, such as private companies and NGOs.

In order to address these challenges, the 2030 Agenda sets out “Sustainable Development Goals” (SDGs) consisting of 17 goals and 169 targets that are interrelated and closely linked to each other.

The key feature of the SDGs is that while the MDGs were goals for developing countries, the SDGs are universal goals applicable to all countries and include issues that developed countries must address as well, such as inequality, sustainable consumption and production, and action to combat climate change. Furthermore, revitalizing a “Global Partnership” is incorporated into the Agenda so that various actors, such as governments, civil society, and the private sectors of both developed and developing countries, can work together to achieve goals and targets, using various resources, including ODA and private finance.

**Outline of Sustainable Development Goals (SDGs)**

1. **Goal 1 (No Poverty)**
   - End poverty in all its forms everywhere

2. **Goal 2 (Zero Hunger)**
   - End hunger, achieve food security and improved nutrition and promote sustainable agriculture

3. **Goal 3 (Good Health)**
   - Ensure healthy lives and promote well-being for all at all ages

4. **Goal 4 (Quality Education)**
   - Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

5. **Goal 5 (Gender Equality)**
   - Achieve gender equality and empower all women and girls

6. **Goal 6 (Water & Sanitation)**
   - Ensure availability and sustainable management of water and sanitation for all

7. **Goal 7 (Energy)**
   - Ensure access to affordable, reliable, sustainable and modern energy for all

8. **Goal 8 (Decent Work & Growth)**
   - Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

9. **Goal 9 (Infrastructure, Industry & Innovation)**
   - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

10. **Goal 10 (Reduce Inequality)**
    - Reduce inequality within and among countries

11. **Goal 11 (Sustainable Cities)**
    - Make cities and human settlements inclusive, safe, resilient and sustainable

12. **Goal 12 (Responsible Consumption & Production)**
    - Ensure sustainable consumption and production patterns

13. **Goal 13 (Climate Action)**
    - Take urgent action to combat climate change and its impacts

14. **Goal 14 (Life below Water)**
    - Conserve and sustainably use the oceans, seas and marine resources for sustainable development

15. **Goal 15 (Life on Land)**
    - Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss

16. **Goal 16 (Peace)**
    - Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

17. **Goal 17 (Partnership)**
    - Strengthen the means of implementation and revitalize the Global Partnership for sustainable development
Japan’s initiatives for implementing the SDGs
Launch of the SDGs Promotion Headquarters and Adoption of the Implementation Guiding Principles

Based on a long track record of achieving sustainable development both at home and abroad, Japan is taking further steps, in domestic activities and international cooperation, to fully implement the 2030 Agenda, leaving no one behind.

1. Building the National Implementation Framework
On May 20, 2016, the SDGs Promotion Headquarters was launched within the Cabinet as a new National Implementation Framework to ensure a whole-government approach. Headed by the Prime Minister and attended by all Ministers, this entity will serve as a control tower to implement, monitor, and review the efforts of the Government to implement the 2030 Agenda.

2. Formulating the Implementation Guiding Principles
On December 22, 2016, the Headquarters formulated the SDGs Implementation Guiding Principles as national strategy to implement the 2030 Agenda.

The Principles set out Japan’s vision: “Become a leader toward a future where economic, social and environmental improvements are attained in an integrated, sustainable and resilient manner while leaving no one behind.” The Principles also set out eight priority areas of focus by reconstructing the 17 SDGs in light of the national context, along with 140 concrete policies to implement domestically and abroad, listed with an index.

The SDGs Promotion Headquarters

3. Taking a Multi-Stakeholder Approach
The SDGs Promotion Headquarters emphasizes enhanced partnership with a broader set of stakeholders, and established the SDGs Promotion Roundtable Meeting where all stakeholders including local governments, NGOs/NPOs, academia, the private sector, international organizations, and various other organizations, gather and exchange opinions.

In implementing the SDGs based on the SDGs Implementation Guiding Principles, the Government of Japan aims to cooperate more closely with all stakeholders, utilizing the Framework, such as these SDGs Promotion Roundtable Meetings.

In addition, the Government of Japan is making utmost efforts to reach people nationwide through various media to raise awareness and improve understanding of the 2030 Agenda across the broader public.

4. Supporting Global Implementation of the 2030 Agenda
Japan is also taking proactive steps to support the global implementation of the 2030 Agenda in a wide range of areas, such as global health, disaster risk reduction, promotion of quality infrastructure investment, and women’s empowerment. These steps are being taken under the Development Cooperation Charter, which has adopted the concept of human security as a guiding principle.

Furthermore, Japan will support developing countries to formulate national strategies and programs and mainstream the SDGs into them.

2030 Agenda and Human Security

Human Security is a philosophy that aims to protect individuals and communities as well as empower them so that they can mobilize their potential to cope with a variety of threats by themselves.

A resolution on human security adopted by the UN General Assembly in 2012 calls for “people-centered, comprehensive, context-specific and prevention-oriented responses.” This is compatible with the 2030 Agenda, based on the concepts of “people-centered” and “leave no one behind” and upholding an integration of three dimensions of sustainable development, environment, economy, and society.

Japan took the initiative to establish the Trust Fund for Human Security in 1999. This fund implements projects from the viewpoint of a “Human Security Approach”. By the end of 2015, 224 projects had been implemented in 88 countries and regions, and Japan had contributed a total of 410 million USD.

Japan also supports projects with the human security approach through a variety of schemes, such as projects strengthening the “Humanitarian and Development Nexus,” as well as joint cross-sectoral projects undertaken by different UN organizations in Syria and Madagascar.

Japan’s Contribution in Africa for Achieving the SDGs
In August 2016, the Sixth Tokyo International Conference for African Development (TICAD VI) was held in Africa for the first time. To help implement the 2030 Agenda and other international initiatives including the G7 Ise-shima Summit in Africa, Japan committed to invest approximately 30 billion USD under public-private partnership for the future of Africa, focusing on economic diversification and industrialization, promoting resilient health systems, and promoting social stability.
In September 2015, the Japanese Government approved “the Basic Design for Peace and Health,” considering implementation of the SDGs. The Basic Design aims to: 1) reinforce global health architecture that can respond to public health crises; 2) achieve Universal Health Coverage; and, 3) make full use of Japanese human resources, expertise and technology, on health.

In order to provide this support, Japan will contribute a total of about 1.1 billion USD to international organizations (Global Fund, WHO, World Bank, GAVI, GFATF/UNDP). Also, in order to strengthen the response to public health crises in Africa, Japan has committed to training 20,000 specialists on infectious diseases and to increasing the number of people who have access to basic health services in Africa by as many as 2,000,000.

In May 2016, Japan announced the “Development Strategy for Gender Equality and Women’s Empowerment,” considering implementation of the SDGs. The Development Strategy emphasizes: 1) promoting women’s and girls’ rights and reducing conditions that contribute to their vulnerability; 2) improving an enabling environment for women and girls to reach their full potential; and, 3) advancing women’s leadership, in politics, economy and other public fields. Promoting women’s active participation and realizing quality growth, Japan will aim to develop gender-responsive infrastructure ensuring safety for women and girls, improve maternal and child health services, and to promote girls’ education and encourage women to take active roles in science fields, as well as to support women’s participation and leadership in various fields, including disaster risk reduction.

In India, for example, Japan has supported the development of subway systems that ensure women’s safety, with women-only passenger cars and security provisions. In Afghanistan, Japan is supporting a training project for female police officers to respond to issues regarding women’s human rights and safety.

To promote these efforts, Japan has committed to supporting human resource development programs for about 5,000 female officials and professionals, and to improving the learning environment for about 50,000 girls over the three years from 2016 to 2018. It will also conduct supportive projects totaling 3 billion over the three years from 2016 to 2018.

In March 2015, the Third UN World Conference on Disaster Risk Reduction was held in Sendai, Japan. This conference organized by the UN was held to discuss international disaster risk reduction strategies. Since Japan proactively promotes international cooperation in disaster risk reduction utilizing its knowledge and experiences, Japan was once again the host country for the 3rd conference, following its hosting of the 1st in 1994 in Yokohama and the 2nd in 2005 in Kobe. More than 6,500 people representing 185 UN Member States attended the 3rd conference. When related events are included, a total of more than 150,000 people from Japan and other countries participated, making it one of the largest ever international conferences held in Japan. The conference resulted in the adoption of the Sendai Declaration, as well as the Sendai Framework for Disaster Risk Reduction 2015-2030 (Sendai Framework), as the international guiding principles for disaster risk reduction. The Sendai Framework incorporates Japan’s opinions on the importance of investment in disaster risk reduction, the involvement of diverse stakeholders, the concept of “Build Back Better,” and the importance of women’s leadership.
