

Central Sulawesi Earthquake Public–Private Assistance Package

Build Back Better for a Resilient/Tangguh Indonesia

October 12, 2018

All of Japan – from the Government of Japan to Japanese corporations – to provide comprehensive assistance for the Central Sulawesi earthquake and tsunami disaster.

1. Emergency Assistance

Emergency assistance to protect disaster victims

(1) Dispatch the Japan Disaster Relief team (SDF)

- Dispatch one C-130H (Hercules) aircraft and approximately 50 Self-Defense Force (SDF) members to airlift supplies and displaced persons. (Ongoing)

(2) Provide emergency relief supplies

- Supply tents, generators, water purifiers, etc. (Completed)

(3) Assistance from Japanese corporations (approx. Rp. 20 billion/¥160 million)

- Distribute financial donations, supplies and fuel provided by Japanese corporations (over 60 companies).

※ The ASEAN Coordinating Centre for Humanitarian Assistance on Disaster Management (AHA Centre), which is supported by the Government of Japan, is conducting on site emergency needs assessment of the disaster and coordinating international aid delivery in addition to delivering emergency aid supplies. (Ongoing)

2. Rehabilitation & Reconstruction Assistance

Utilizing Japan's knowledge to provide rehabilitation and reconstruction assistance to afflicted areas

Conduct JICA survey for policy review of rehabilitation and reconstruction

- JICA will promptly conduct a survey drawing on Japan's past experiences in rehabilitation assistance and post-earthquake reconstruction to help the Government of Indonesia prepare a rehabilitation and reconstruction blueprint based on the "Build Back Better" concept.

3. Earthquake & Tsunami Countermeasure Assistance

Assistance to prevent extensive damage from future earthquakes and tsunamis throughout Indonesia

(1) Tangible measures

① The Project for Improvement of Equipment for Disaster Risk Management (Grant) (Approx. Rp. 187.5 billion/¥1.5 billion)

- Donate and install broadband seismographs, strong-motion seismographs, etc. at 93 sites throughout Indonesia within the year. (Planned)

(2) Intangible measures

① Cooperation on the Capacity Development of Disaster Information Management and Communication (Technical cooperation)

- Strengthen the capacity to collect and analyze frequent disaster information to utilize and reflect it in the disaster prevention plan formulated.

② Utilization of JICA Experts (Technical cooperation)

- JICA experts with know-how on disaster prevention are currently working with Indonesian government agencies responsible for disaster response and reconstruction, such as the National Agency for Disaster Management (BNPB), Ministry of Public Works and Housing, etc.
