Question 16

133. Please see Tables 16-1 to 16-3, which are lists of budgets relating to support for measures related to support for development of children and young people from FY2016 to FY2018. The budget value provides a total of direct and indirect outlays toward support of the development of children and young people and includes many budgets from which the portion just for children and young people is inseparable.

134. The amounts of social security-related expenditures in the past three years are as follows:

FY2016 31,973.8 billion Japanese yen;

FY2017 32,473.5 billion Japanese yen; and

FY2018 32,973.2 billion Japanese yen.

Total Amount		4,819,391	133,132	5,104,294	284,640
Note)					
1.	The above items are laid out in accordance with the categorization of items listed in the outline under the Act on Promotion of Development and Support for Children and Young People (the "Outline for the Promotion of Development and Support for Children and Young People").				
2.	Some measures or projects cover more than one of the above items. In those cases, their primary items are indicated in bold and Gothic font with their names of projects, etc., and budget amounts. Other secondary items of them are indicated as "as shown above" in Ming-style font ("Note that, for convenience of laying out the items, some of the items indicated as "as shown above" appear in advance of those designated as primary ones).□				
3.	When total budget amounts of measures and projects include budget amounts relating to measures to provide support for development of children and young people, the latter amounts cannot be indicated separately from the former. In addition, when only items of measures and projects, not their budget amounts, are required to be included in draft budgets, the budget amounts cannot be identified concretely. In both of those cases, the budget amounts are indicated as void, i.e., "-." Furthermore, identifiable total budget amounts of those measures and projects are shown in the remarks columns. The total amount of the above table is a sum of the amounts which can be identified separately and concretely.				
4.	Some of the increased/decreased amounts may have margins of errors by being rounded off to the nearest million Japanese yen. Furthermore, when either FY2015 or FY2016 but not both includes "-", increased/decreased amounts are indicated as "-." Therefore, in those cases, total amounts of the increased/decreased amounts may have margins of errors.

○Patient survey

The patient survey is a result of a survey conducted once three years with regard to circumstances surrounding patients who use medical facilities (hospitals, general clinics, dental clinics) on one designated day during three days of October. Its coverage extended to patients who use medical facilities throughout Japan. The survey was conducted on patients of medical facilities extracted by a stratified random sampling.

○Total number of patients

The total number of patients is that of persons continuously receiving medical treatment as of the date of the survey (including those who did not receive medical treatment in medical facilities on the date of the survey), estimated by the following formula.

Total number of patients = Number of hospitalized patients + Number of outpatients for first medical examination + (Number of outpatients for follow-up medical examination × Average medical interval × Adjustment factor (6/7))

(Note) The above number excludes the number of patients whose last medical treatment was conducted 31 days and more before the date of the survey.

○Estimated number of patients

The estimated number of patients is that of patients who received medical treatment in medical facilities on the date of the survey.

Question 20

(a) Children diverted from the juvenile justice system

158. While the meaning of the phrase “diverted from the juvenile justice system” mentioned here is not entirely clear, in Japan, a juvenile who commits a crime is commonly treated not by criminal proceedings but by non-criminal proceedings including protective measures in accordance with provisions of the Juvenile Act. For instance, please see Table 20 (a) with regard to the number of juveniles against whom family courts made rulings to refer their cases to prefectural governors or child guidance centers’ directors (Article 18 of the Juvenile Act), not to commence hearings (Article 19, paragraph (1) of the Act), not to subject them to protective measures (Article 23, paragraph (2) of the Act) and to place them under probation (Article 24, paragraph (1) of the Act).

Table 20 (a) Number of juveniles against whom family courts made rulings to refer their cases to prefectural governors or child guidance centers' directors, not to commence hearings, not to subject them to protective measures and to place them under probation (disaggregated by age and final ruling)

(b) Children in pretrial detention

159. We do not keep statistics on children from 0 to 18 years old who were detained in detention facilities. As numbers most similar to such statistics, we would like to introduce the following numbers. They are those of persons under 20 years old who were detained in detention facilities in the past three years, which aggregate results of surveys covering all the prefectures conducted by the National Police Agency.

Persons

Year	Male	Female	Total
2015	10,466	737	11,203
2016	9,196	679	9,875
2017	8,437	659	9,096
