

COVAX Advance Market Commitment (AMC) Summit
Part 4. Summary of the private sector commitments by
Foreign Minister MOTEGI Toshimitsu
(June 2, Wednesday)

Thank you very much for excellent presentations by three partners.

The COVAX Facility is supported by not only countries and international organizations but also generous donors and partners of the private sector and civil society. The role of such partners is essential for achieving equitable access to vaccines.

Japan is committed to providing "Last One Mile Support" by delivering vaccines to immunization sites in each country in a way that is complementary to the COVAX Facility, which procures and allocates vaccines.

For example, Japan's refrigerated vehicles introduced in this Session can reliably deliver vaccines to areas where it's difficult to transport vaccines, due to extreme heat or remote locations.

We have high hopes that partners in wide-ranging fields in healthcare and other sectors will collaborate with the COVAX Facility so that vaccination efforts will be most effective.

Thank you very much.
