

BASIC POLICY OF JAPAN'S ASSISTANCE TO TURKEY

The global partnership between Japan and Turkey has been reinforced through improving cooperation at the level of both public and private sector. The two countries could work closely in the field of assistance in third countries with the aim of solving the problems regarding human resources development, strengthening of society as well as sustainable economic growth which Turkey determines as essential fields.

4 PRIORITY AREAS

Supporting the Development of Strong Urban Infrastructure for the Economic Development	Strengthening Cooperation with Private Sector	Strengthening Cooperation with Development Partner	Supports towards Syrian Refugee Policies

2013	42,979	123	656	17
2014	-	165	930	31
2015	46,000	421	954	31
2016	-	280	411	47
2017	-	379	281	43

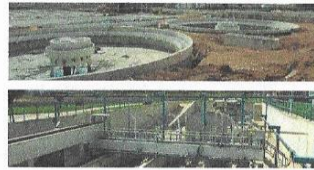

EASING TRAFFIC CONGESTION IN ISTANBUL

Istanbul, where nearly 20% of Turkey's population resides, is one of the world's leading tourist destinations. The city has chronic traffic congestion. In order to reduce the traffic congestion at the city center, a railway tunnel was constructed underneath the Bosphorus strait, 90 meters below the sea level, by using high-level Japanese technical construction expertise and technology. Marmaray underwater tunnel is the deepest underwater immersed tunnel in the world.

IMPROVEMENT OF INFRASTRUCTURE IN MUNICIPALITIES HOSTING SYRIAN REFUGEES

Turkey hosts over 3.8 million Syrian refugees and this leads to deterioration in municipality services in some provinces, such as water supply, sewerage and solid waste management. As it is seen in Gaziantep province, Japan gives financial assistance to improve infrastructure for water, waste water and solid waste management in local administrations affected by the inflow of Syrian refugees and to improve living environment for local residents.

THIRD COUNTRY TRAINING PROGRAM

SENIOR VOLUNTEERS

After the Erzincan earthquake 1959, Turkey had many earthquakes which caused thousands of deaths. The government of Turkey tried to develop human resources specialized in disaster risk reduction and dispatched government officials for disaster prevention in training in Japan in 1959. This was the beginning of Japan's ODA to Turkey
