

Annex 2
referred to in Chapter 3

Product Specific Rules

Part 1
General Notes

1. This Annex sets out the general rules for the applicable requirements provided for in subparagraph (c) of Article 3.2.
2. For the purposes of the product specific rules set out in this Annex:
 - (a) the product specific rule, or specific set of rules, that applies to a particular Chapter, heading or subheading is set out immediately adjacent to the Chapter, heading or subheading;
 - (b) where the specific set of rules provides for more than one rule to be selectively applied, the order of the description of the rules does not indicate priority of application;
 - (c) reference to weight in this Annex means dry weight unless otherwise specified in the Harmonized System;
 - (d) the following definitions apply:
 - (i) “QVC40” or “QVC30” respectively means that the good has a qualifying value content, calculated using the formula set out in paragraph 1 of Article 3.4, of not less than 40 percent or 30 percent, and the last process of production has been performed in a Party;
 - (ii) “CC” denotes a change to the Chapter, heading or subheading from any other Chapter. This means that all non-originating materials used in the production of the good have undergone a change in tariff classification at the two-digit level (i.e. a change in Chapter) of the HS;

- (iii) “CTH” denotes a change to the Chapter, heading or subheading from any other heading. This means that all non-originating materials used in the production of the good have undergone a change in tariff classification at the four-digit level (i.e. a change in heading) of the HS;
- (iv) “CTSH” denotes a change to the Chapter, heading or subheading from any other subheading. This means that all non-originating materials used in the production of the good have undergone a change in tariff classification at the six-digit level (i.e. a change in subheading) of the HS; and
- (v) “CR” means the chemical reaction rule. Any good that is a product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in a Party. A “chemical reaction” is a process, including a biochemical process, which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for the purposes of this definition:
 - (A) dissolving in water or other solvents;
 - (B) the elimination of solvents including solvent water; or
 - (C) the addition or elimination of water of crystallization;
- (e) this Annex is based on the Harmonized System as amended on January 1, 2022; and
- (f) specific percentage referred to in Article 3.6, which relates to the total value or the total weight of non-originating materials used in the production of a good that do not undergo an applicable change in tariff classification, is as follows:

- (i) in the case of a good classified under Chapters 1 through 49 and 64 through 97 of the HS, 10 percent in value of the good; and
- (ii) in the case of a good classified under Chapters 50 through 63 of the HS, 10 percent by weight of the good.

Note 1: The term “value of non-originating materials” means the value determined in accordance with paragraph 3 of Article 3.4.

Note 2: The term “value of the good” means the free-on-board value of the good referred to in paragraph 1 of Article 3.4 or the value set out in paragraph 2 of that Article.

Notes to Section XI (Chapters 50 through 63):

1. For the purpose of application of the product specific rules to a good classified under Chapters 50 through 55 and 60 of the HS, dyeing or printing process shall be accompanied by two or more of the following operations:

- (1) antibacterial finish;
- (2) antimelt finish;

- (3) antimosquito finish;
- (4) anti-pilling finish;
- (5) antistatic finish;
- (6) artificial creasing;
- (7) bleaching;
- (8) brushing;
- (9) buff finish;
- (10) burn-out finish;
- (11) calendering;
- (12) compressive shrinkage;
- (13) crease resistant finish;
- (14) decatizing;
- (15) deodorant finish;
- (16) easy-care finish;
- (17) embossing;
- (18) emerizing;
- (19) flame resistant finish;
- (20) flock finish;

- (21) foam printing;
- (22) liquid ammonia process;
- (23) mercerization;
- (24) microbial control finish;
- (25) milling;
- (26) moare finish;
- (27) moisture permeable waterproofing;
- (28) oil-repellent finish;
- (29) organdie finish;
- (30) peeling treatment;
- (31) perfumed finish;
- (32) relaxation;
- (33) ripple finish;
- (34) schreiner finish;
- (35) shearing;
- (36) shrink resistant finish;
- (37) soil guard finish;
- (38) soil release finish;

- (39) stretch finish;
- (40) tick-proofing;
- (41) UV cut finish;
- (42) wash and wear finish;
- (43) water absorbent finish;
- (44) waterproofing;
- (45) water-repellent finish;
- (46) wet decatizing;
- (47) windbreak finish; or
- (48) wire raising.

2. In determining the origin of a good classified under Chapters 61 through 63 of the HS, the requirement of the change in tariff classification applicable to that good shall only apply to the component that determines the tariff classification of that good, and such component must satisfy the requirement of the change in tariff classification set out in the rule for that good.
