

Global Business Seminar

～“Program for Promotion of Foreign Direct Investment in Japan 2025”～

As part of the government's initiatives to promote foreign direct investment (FDI) in Japan, Global Business Seminar will be held as outlined below.

At this seminar, government officials will give presentations on the overview and specific measures of "Program for Promotion of Foreign Direct Investment in Japan 2025," which was adopted last June with the aim of expanding FDI in Japan. Additionally, local governments are scheduled to give presentations on specific investment attraction support measures.

We look forward to the participation of foreign companies and investors considering executing or expanding FDI in Japan, including cross-border service expansion and startup investment, as well as those interested in collaboration with foreign companies and local governments engaged in attracting foreign companies.
