Japan’s assistance to the Palestinians

Background

● Middle East peace process is a core issue of the Middle East and North African region and is vital for the region’s stabilization.
● Following the “Arab Spring,” instability of neighboring countries and stagnation of the peace process have resulted in serious economic situations in Palestine as shown in aggravated inflation and unemployment rate of the youth. The situation of the Gaza Strip is deteriorated.

● Japan supports a two-state solution whereby Israel and a future independent Palestinian state coexist and prosper together. On this basis, Japan has been extending assistance to the Palestinians focusing on 3 pillars; ① political approach to the two sides, ② assistance for Palestinians’ state-building efforts, and ③ confidence building measures between the two sides.
● Japan’s assistance amounts to 1.9 billion US dollars in total since 1993.
