Sustainable Development Goals: SDGs

This First National Action Plan on Business and Human Rights (NAP) was adopted from the realization of the duty to respond to human rights violations, including Action Plan on

- Labour
- Community, land, natural resources and the environment
- Human rights defenders
- Cross Border Investment and Multinational Enterprise

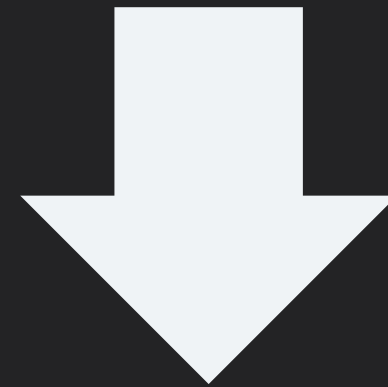

The UN Guiding Principles on Business and Human Rights : UNGPS

## Activities

- Require studies and assessments of the risk and impact on human rights **(Human Rights Due Diligence: HRDD) before undertaking large-scale projects** or projects related to public services, including in the case of joint investment between the government and private sectors **to prepare conducting projects relating to infrastructure** and public services that are a duty of the state, including in the case that the government has assigned the private sector to do the project instead.

## Indicators

- A study to assess the risk and human rights impact (Human Rights Due Diligence: HRDD) before the implementation of large scales project

## Mid-Term Evaluation (Project Monitoring)

- At least 2 times per year on site
- Increase meaningful contribution
- Realize that workers often bring their children with them (meaning that children live in construction site camps)
- Additional indicator in construction sector such as safe water facilities, sanitation, physical safety (**UNGPs/ requirements of human rights due diligence**)

Project Monitoring on the Construction of Border Crossing Facilities and Access Road to NR5 Project in Cambodia.

# Implementation Progress of Action Plan

# Action Plan on “Enhancing Reliability of NEDA’s Project Evaluation Report”

## 6. Action Plan Preparation

### Objective

- 1 To enhance reliability of NEDA’s evaluation report focusing on Project Completion Evaluation (Report).
2. To develop data collection strategy / indicators / framework which is responsive to evaluation system.

## “Action Plan on Enhancing Reliability of NEDA’s Project Evaluation Report”

1

**Stage 1**  
Analyzing current  
methodology and  
existing data.  
(To understand the root  
cause of the problem)

2

**Stage 2**  
Seeking for alternative  
tools to increase  
reliability of project  
evaluation report  
(Triangulation)

3

**Stage 3**  
Collecting new data  
within the time and  
resource constraints  
of an evaluation.

4

**Stage 4**  
Finding local experts  
as continuing resource  
persons to help  
interpret the results as  
an integral part of an  
evaluation.

5

**Stage 5**  
Formulating  
recommendations  
and lessons learned.

6

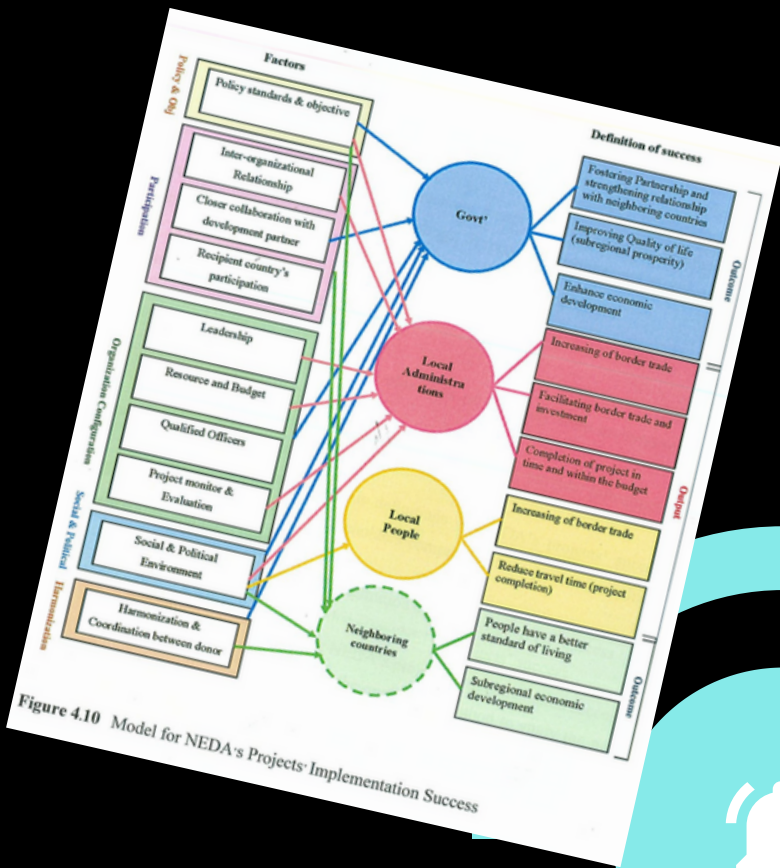

**Stage 6**  
Reporting the result to  
management

7

**Stage 7**  
Revision of NEDA’s  
Evaluation  
Guidelines for  
internal use.
