. Achieving Peaceful, Safe and Secure Societies
. Strengthening the Means and Frameworks of the Implementation of the SDGs

## Sustainable Development Goals (SDGs) Implementation Guiding Principles

### . Introduction

# (1) Background on the adoption of the 2030 Agenda and its implications for Japan

Today's global economy is driven by the worldwide movement of people, goods and currency, and an economic crisis in one country can have immediate impact on other countries. In addition, climate change, natural disasters, infectious diseases and other global issues can set off chain reactions, hampering social and economic growth and causing serious impacts across the globe. In light of these facts, the United Nations adopted the 2030 Agenda for Sustainable Development (the 2030 Agenda) in September 2015 to not only address the issues faced by developing countries, but also to encompass global agendas that are integrated and indivisible, harmonizing the three dimensions of sustainability-economic, social and environmental sustainability. The 2030 Agenda was thus adopted to describe the universal goals of the entire international community, both developed and developing countries, should achieve together. It comprises 17 Sustainable Development Goals (SDGs) and 169 targets.

Accordingly, in order to implement the 2030 Agenda, it is not enough for developed countries to merely support developing countries. The 2030 Agenda begins with "transforming our world" and further states in its preamble that "We are determined to take the bold and transformative steps which are urgently needed to shift the world on to a sustainable and resilient path." We renew our resolution to further accelerate our efforts based on the principle of international cooperation. We also bear in mind that our work to bolster domestic efforts on economic, social and environmental sustainability as well as cross-dimensional issues are part of global efforts to tackle the challenges to sustainable development.

### (2) Establishment of the SDGs Promotion Headquarters and the SDGs Implementation Guiding Principles

The Government of Japan has established a Cabinet

body, the SDGs Promotion Headquarters, headed by the Prime Minister and composed of all ministers on May 20, 2016, in order to ensure a whole-of-government approach to implementing the 2030 Agenda in a comprehensive and effective manner. At the first meeting of the Headquarters on the day of its establishment, the decision was made to set Japan's SDGs Implementation Guiding Principles. Following this decision, the government has widely sought the opinions of citizens and has held dialogues with a range of stakeholders to draft the Implementation Guiding Principles.

The Implementation Guiding Principles represent Japan's national strategy to address the major challenges for the implementation of the 2030 Agenda. The document sets out Japan's vision, priority areas, implementation principles, implementation framework and approach to the follow-up and review processes, as well as concrete measures clustered under priority areas. It aims to mobilize all ministries and government agencies by partnering with all relevant stakeholders to implement a wide variety of measures and resources in an effective and coherent manner, based on an analysis of the present situation in Japan and abroad.

## 2. Analysis of the Present Situation

#### (I) Japan's efforts to date

In the years since World War II, Japan has steadily achieved economic growth and built a highly advanced society. The Basic Environment Act was enacted and the Basic Environment Plan was formulated in accordance with the outcome of the United Nations Conference on Environment and Development held in 1992, and the government has been implementing measures in an integrated manner to build a sustainable society through environmental, economic and social improvements. In addition, the Government of Japan has been working to prepare for large-scale natural disasters under the Basic Act for National Resilience. Moreover, Japan has embarked on creating an inclusive and participatory society in which every individual can achieve his or her

full potential. In line with this ideal, Japan has forged ahead by reforming the relevant systems by enforcing the Basic Act for Gender Equal Society, the Act on Promotion of Women's Participation and Advancement in the Workplace, and the Basic Act for Persons with Disabilities.

On international cooperation, the Government of Japan began its Official Development Assistance (ODA) in 1954, soon after the end of World War II, and 35 years later was the world's top ODA donor country in 1989. Japan has proactively contributed to the peace, stability and prosperity of the entire international community for over 60 years. Since 2000, Japan has set human security as the guiding principle that lies at the foundation of its diplomacy and development cooperation, and has extended support for people who have been left behind, such as refugees or persons displaced due to conflicts. Japan has placed issues such as health, disaster risk reduction and gender equality, which are listed in the SDGs as major challenges to be addressed, at the core of its international cooperation. Based on this experience, Japan has played a leading role in formulation of the 2030 Agenda, including the individual goals and targets. In February 2015, prior to the adoption of the 2030 Agenda, the Government of Japan established the Development Cooperation Charter to define its development cooperation philosophy and principles, which also serves as its basic policies to implement the 2030 Agenda.

#### (2) Assessment of the present situation

As a result of its past efforts, Japan has continued to achieve an extremely high level of development. However, some areas in which Japan must continue its efforts have also been noted. For example, in the 2016 joint report by the Bertelsmann Foundation of Germany and the Sustainable Development Solutions Network (SDSN), Japan received low achievement scores regarding some of the indicators for Goal 1 (Poverty), Goal 5 (Gender Equality), Goal 7 (Energy), Goal 13 (Climate Change), Goal 14 (Marine Resources), Goal 15 (Terrestrial Resources) and Goal 17 (Means of Implementation).

Japan has already begun addressing many of the

aforementioned issues in its policy agenda, but there still remain areas in which Japan should further strengthen its efforts. It is indeed necessary for Japan to re-identify the issues to be tackled in relation to the SDGs and make better use of its past experiences, both domestically and internationally, to forge a sustainable future for Japan as well as for the international community.

For example, the key principle of the 2030 Agenda that "no one will be left behind" is embodied in the goals of the entire international community, and reflects the concept of human security, for which Japan has been a leading advocate. This notion is in line with Japan's domestic policies that promote a society where all citizens can participate and play an active role through its Plan for Dynamic Engagement of All Citizens decided by the Cabinet in June 2016. Under the plan, the government is implementing measures to create virtuous cycles of growth and distribution, i.e. to build a new economic system where we enhance childcare support and social security as a broader economic policy which will lead to a more robust economy. Many countries across the world are now confronted with aging populations, and Japan is striving to provide a "Japan model" for a sustainable economy and society ahead of other developed countries.

In the environmental field, the Government of Japan clarified its stance in the Basic Environment Plan to aim for integrated environmental, economic and social improvements. Similarly, through the Paris Agreement adopted at the 21st session of the Conference of the Parties to the United Nations Framework Convention on Climate Change (held in December 2015) and the Plan for Global Warming Countermeasures developed in line Japan's Intended Nationally Determined Contribution (INDC), the Government of Japan is committed to fostering measures for integrated environmental, economic and social improvements. In addition, the Fundamental Plan for Establishing a Sound Material-Cycle Society and the National Biodiversity Strategy of Japan 2012-2020 are already developed and serving as the basis for various policy measures which are underway. These Plans and Strategy are consistent with the spirit of the 2030 Agenda.

Moreover, in the area of global health, Universal Health Coverage (UHC) was included in the SDGs targets. Japan attaches great importance to UHC as a country that established its own universal health insurance coverage (Kokuminkaihoken) as early as 1961 and has maintained the system for more than 50 years. Japan will demonstrate leadership in this field as a clear testimony to its commitment to human security in the context of international cooperation.

## 3. Vision and Priority Areas

#### (I) Vision

In regard to our efforts to implement the SDGs, the 2030 Agenda states the following:

"We resolve, between now and 2030, to end poverty and hunger everywhere; to combat inequalities within and among countries; to build peaceful, just and inclusive societies; to protect human rights and promote gender equality and the empowerment of women and girls; and to ensure the lasting protection of the planet and its natural resources. We resolve also to create conditions for sustainable, inclusive and sustained economic growth, shared prosperity and decent work for all"

Japan wishes to contribute to the world as a leading solution provider by sharing its successes and lessons learned in building a sustainable economy and society at home. Japan aims to become a role model for the world in the implementation of measures to achieve the SDGs and will make efforts both in Japan and in cooperation with other countries to achieve sustainable societies worldwide where no one will be left behind.

With the above in mind, Japan has established the following vision: "Become a leader toward a future where economic, social and environmental improvements are attained in an integrated, sustainable and resilient manner while leaving no one behind."

#### (2) Priority areas

In order to achieve the aforementioned vision, Japan has set out eight priority areas. While Japan has already achieved some of the targets of the SDGs domestically,

there still remains a range of issues to address in cooperation with other countries to achieve all the goals and targets on a global scale. The eight priority areas outline what areas among the goals and targets of the SDGs Japan should focus on, in light of the national context. These priority areas include both domestic measures and those to be implemented through international cooperation. The priority areas are "Five Ps," clustered into the upheld in the 2030 Agenda: People, Planet, Prosperity, Peace Partnership. All SDGs and targets are indivisible and should therefore be attained in an integrated manner; similarly, the eight priority issues are closely related and inseparable. Based on the recognition that the aforementioned national vision will not be achieved if any one of the priority issues is not successfully addressed, Japan will implement related measures under the priority areas in an integrated manner. Specific measures to be implemented to this end and other related information are described in the Annex.

"5Ps" upheld in the 2030 Agenda and Japan's 8 priority areas

#### **People**

- Empowerment of All People
- 2. Achievement of Good Health and Longevity

#### **Prosperity**

- Creating Growth Markets, Revitalization of Rural Areas, and Promoting Science Technology and Innovation
- Sustainable and Resilient Land Use, Promoting Quality Infrastructure

#### **Planet**

- Energy Conservation, Renewable Energy, Climate Change Countermeasures, and Sound Material-Cycle Society
- Conservation of Environment, including Biodiversity,
   Forests and the Oceans

#### **Peace**

7. Achieving Peaceful, Safe and Secure Societies

#### **Partnership**

 Strengthening the Means and Frameworks for the Implementation of the SDGs

## 4. Major Principles for Implementation

Japan will implement the measures for the priority areas in accordance with the following principles, which are directly described in or derived from the 2030 Agenda. These principles should be taken into account in all priority areas in the course of implementation. The eight priority areas and the concrete measures listed in the Annex will be appraised based on the principles in the course of action, as well as in considering the necessity of new measures or revising measures.

#### (I) Universality

Japan will take further steps domestically and internationally in order to fully implement the 2030 Agenda. Domestic efforts have multifaceted effects that will help achieve international goals at the same time. Likewise, international cooperation is not merely a form of assistance abroad, but also has positive impacts on Japan's domestic prosperity. We should also note the significance of linking domestic measures with international cooperation to effectively address individual priorities.

#### (2) Inclusiveness

The key phrase, "no one will be left behind," encapsulates the philosophy that underpins the 2030 Agenda, demanding actions for all people, including children, youth, persons with disabilities, people living with HIV/AIDS, older persons, indigenous peoples, refugees, internally displaced persons, and migrants. Japan will pay due attention to the most vulnerable individuals in all of its efforts, both domestic and those implemented through international cooperation. In addition, the concept of human security will continue to be a guiding principle for Japan's development cooperation on the implementation of the SDGs.

Additionally, respect for human rights as a universally accepted value in the international community, as well as gender equality and mainstreaming a gender perspective, are indispensable as cross-sectorial values in attaining all goals. They should be included and reflected in all measures. In connection with the advancement of gender equality and mainstreaming a gender perspective, well-developed gender statistics are

crucially important, and efforts shall be made to collect as much gender disaggregated data as possible in the implementation of the SDGs.

#### (3) Participatory approach

In addition to ensuring that no vulnerable people will be left behind in any of the measures, the Government of Japan will foster a participatory approach in which all stakeholders play a role in our efforts to build a sustainable society.

#### (4) Integrated approach

As emphasized in the 2030 Agenda, the goals and targets of the SDGs are indivisible and their implementation should be carried out in an integrated manner. Accordingly, the Government of Japan will take an integrated approach to solve the issues related to the three dimensions of economy, society and the environment, while attaching importance to fostering interactions and synergies among various issues in each priority area. Measures shall be carried out in an integrated and organic manner, bearing in mind the significance of linking different priority areas.

#### (5) Transparency and accountability

Transparency and accountability are important in ensuring the participation of all stakeholders. The Government of Japan will therefore ensure high transparency in the implementation of its measures and will publicly disclose assessments on the progress made on a regular basis to promote accountability. A list of concrete measures will be revised and updated based on the findings of these assessments.

## 5. Implementation Framework

#### (I) Governmental system

The SDGs Promotion Headquarters established within the Cabinet will foster close cooperation among relevant governmental agencies and lead the comprehensive and effective implementation of related measures. The Headquarters will focus in particular on the following items, while cooperating closely with the relevant governmental agencies that are individually implementing the related initiatives:

· Monitor the progress of measures taken in line with

the SDGs Implementation Guiding Principles and review the Guiding Principles, including adjustments of and addition to the current indicators, based on the monitoring results (follow-up and review)

- · Promote exchange of opinions and cooperation/collaboration with stakeholders
- · Conduct awareness raising PR activities for the 2030 Agenda and the Implementation Guiding Principles.

#### (2) Mainstreaming the SDGs

The 2030 Agenda states that "Each government will also decide how these aspirational and global targets should be incorporated into national planning processes, policies and strategies." Accordingly, the Government of Japan and related governmental agencies will incorporate the SDGs into their plans, strategies and policies as much as possible. At the same time, the government will explore means to achieve necessary systemic reforms and endeavor to appropriately secure financial resources as policy incentives to foster both individual and collective efforts of the ministries and other government offices to implement measures in achieving the SDGs.

#### (3) Cooperation with stakeholders

The 2030 Agenda also states as follows:

"It is 'we the peoples' who are embarking today on the road to 2030. Our journey will involve Governments as well as parliaments, the United Nations system and other international institutions, local authorities, indigenous peoples, civil society, business and the private sector, the scientific and academic community—and all people."

As described above, the Government of Japan needs to implement measures for the 2030 Agenda, monitor progress, and conduct follow-up and review activities across agency boundaries and through public-private partnerships. It will do this in cooperation with a wide range of stakeholders, including local governments, NGOs/NPOs, academia, the private sector, international organizations and other entities, parliamentarians, scientists and cooperatives. To this end, the Government of Japan holds roundtable meetings on the items related to the promotion and implementation of the 2030

Agenda. These SDGs Promotion Roundtable Meetings are attended by representatives from the related governmental agencies and other stakeholders. Through these meetings, the Government of Japan aims to cooperate more closely with all stakeholders.

The Government of Japan will also pursue efforts to establish platforms to exchange views and to foster partnerships with relevant stakeholders by linking them with the SDGs Promotion Round Table Meetings established under the auspices of the SDGs Promotion Headquarters in dealing with issues to be addressed by individual ministries and other cross-sectorial issues to be dealt by multiple ministries and agencies. Preceding examples of such platforms are the Stakeholders' Meeting established by the Ministry of the Environment and the Roundtable Meeting on the Education for Sustainable Development (ESD) to which both the Ministry of Education, Culture, Sports, Science and Technology and the Ministry of the Environment, are serving as the secretariat.

The Government of Japan will also enhance close cooperation with a range of stakeholders engaging in philanthropic activities and various other initiatives in support of the SDGs.

#### (NGOs and NPOs)

NGOs and NPOs played an important role on behalf of the general public in the formulation process of the 2030 Agenda. Now, in the implementation of the Agenda, NGOs and NPOs will likewise play an extremely important role in building a future society where "no one will be left behind." They will facilitate collaboration with vulnerable people and advocate on potential challenges and policy options through their networks at the global and regional levels. The Government of Japan views NGOs and NPOs, as well as expanded local communities, private entities, community based organizations and other groups, as important implementing partners and will further foster effective partnerships with these organizations.

#### (Private Companies)

For the achievement of the SDGs, it is critical that not only the public sector, but also the private sector contribute to solutions for the public agenda. Private technologies and resources are necessary for the success of the SDGs. In addition to conventional corporate social responsibility (CSR) activities, some companies have already begun engaging in activities that contribute to solutions to social issues by incorporating the SDGs into their core business. The Government of Japan welcomes this trend and will enhance cooperation with the private sector by sharing the good practices on advanced implementation measures and by giving incentives through awards and other means, with the goal of the further implementation of the 2030 Agenda. The government will also make efforts to create an environment conducive for companies in the private sector to foster innovation in their business.

In particular, the private sector needs to implement sustainability-oriented initiatives such as "business and human rights," Environmental, Social and Governance (ESG) investment, and social bonds, in order to proactively address public agendas related environmental, social, governance issues and human rights. These initiatives are also critical for Japanese companies to maintain their competitiveness in the global market and to avoid falling behind in meeting global investor evaluation criteria, which increasingly focus on the ESG fields. The Government of Japan will implement policies to help companies meet these requirements and will support the private sector in conducting related activities.

#### (Consumers)

Production and consumption are closely and indivisibly related. Sustainable production and consumption should thus be fostered at the same time. Based on this understanding, the Government of Japan will encourage consumers and citizens to take voluntary initiatives as major players in the consumption arena.

#### (Local governments)

Local governments and other local stakeholders are absolutely essential to the nationwide implementation of SDGs-related measures. The national government will therefore encourage local governments to incorporate the SDGs into their strategies and policies as much as possible. Government ministries will support the efforts

of local governments through measures to promote partnership among various stakeholders in achieving the SDGs.

#### (Science community)

Science, technology and innovation (STI) is one of the priority areas of the guiding principles and an essential element for the attainment of targets. The Government of Japan will effectively use STI to implement a range of related measures, including enhanced international cooperation, and to solve emerging issues in a swift and flexible manner. It will also strengthen scientific analysis and evidence in setting and monitoring appropriate indicators to achieve the SDGs, analyze synergy and offset effects among the implemented measures, and take actions based on scientific analysis in the follow-up and review process. To this end, the government will foster systematic cooperation and collaboration with the scientific community in Japan as well as international initiatives such as Future Earth.

#### (Labor unions)

Labor unions, as a vehicle for social dialogue, can make important contributions to achieving decent work for all and building a sustainable economy and society by ensuring fair labor conditions, human rights, environment protection, safety, and peace both at the national and international levels, and by exercising mechanisms for collective employer-employee relationships. The Government of Japan will promote dialogue with labor unions both at the planning and implementation phases of measures related to the SDGs by the national and local governments.

#### (4) Communication

The SDGs Promotion Headquarters will proactively plan and lead communication activities to promote SDGs-related measures as a national movement in order to increase public understanding and support for engagement with the SDGs. The Headquarters, in cooperation with the UN, international organizations and other stakeholders, will also actively share Japan's efforts with the world through a range of international conferences and other opportunities.

To this end, the Government of Japan will foster the sharing of good practices among implementing partners, including the private sector, by giving awards and promoting the use of SDGs logos and branding.

Moreover, the Government of Japan will further promote Education for Sustainable Development (ESD) as well as encourage learning about SDGs in all settings, including schools, households, workplaces and local communities in order to nurture in children, who will lead society in 2030 and beyond, the competencies to be a creator of sustainable societies and the world.

## 6. Follow-up and Review

In order to appropriately monitor the progress of SDGs-related measures in Japan, the Government of Japan will make proactive use of the relevant statistical data, Earth Observation Data and other data, while employing key performance indicators (KPIs) to the extent possible. The SDGs global indicators will be utilized in these KPIs as much as possible. The progress of the measures listed in the Implementation Guiding Principles will be reviewed based on these indicators, and the review of the Guiding Principles will be conducted in a transparent and accountable manner. The government will also report progress to the United Nations as appropriate, based on the indicators at global or national levels. In addition, the follow-up and review

will be examined against the principles listed in Section 4 (Major Principles for Implementation) of this document.

In the review of the Implementation Guiding Principles, new measures that are deemed relevant to the SDGs will be added, taking into account the progress made in the implementation of existing measures.

The Government of Japan will proactively participate in and contribute to the global follow-up and review process of the implementation of the 2030 Agenda through participation in the High-level Political Forum on Sustainable Development (HLPF). Japan will present at Voluntary National Reviews of the HLPF in 2017 and will consider participating in its subsequent reviews. The government will consider completing the first round of follow-up and review of the present Implementation Guiding Principles by 2019, looking toward the session of the HLPF to be convened by the President of the General Assembly in the same year. Subsequent to the 2019 HLPF, follow-up and review will be conducted, taking into account the four-year cycle of the HLPF organized by the President of the General Assembly.

The government will ensure the participation of a range of broad stakeholders in the follow-up and review process, similar to the process of formulating this document.

#### 17 Goals to transform our world

## **Specific Measures to Achieve the Sustainable Development Goals**

## I. Empowerment of All People

SDGs that are considered to be particularly relevant :

SDGs 1 (Poverty), 4 (Education), 5 (Gender), 8 (Economic growth and employment), 10 (Inequality), 12 (Sustainable consumption and production patterns), and others

	Outline of the measures	Target	Indicator	Related governmental agency			
	Based on the Japan's Plan for Dynamic Engagement of All Citizens, implement the following measures to create a society in which all citizens are dynamically engaged.						
Creation of a society with dynamic engagement of all citizens: Working-style reform	Working-style reform represents the biggest challenge to be met across the board to create a society in which all citizens are dynamically engaged. Accordingly, implement measures to provide workers with more working style options by improving working conditions of non-regular workers including the achievement of equal pay for equal work, reducing overtime work and total working hours, and fostering the employment of older workers by encouraging companies to increase the retirement age to 65 and offer their employees ongoing employment even after reaching that age.	8.5	Indicators set in the Japan's Plan for Dynamic Engagement of All Citizens	Cabinet Secretariat and others			
(Employment)  Reduction of overwork	Based on Japan's Plan for Dynamic Engagement of All Citizens, enhance the execution of the legal regulations and also start reexamining how to regulate overtime work approved under the so called "36 agreement," which is made between an employer and the labor union in accordance with Article 36 of the Labor Standards Act to allow the employer to extend the working hours of employees without limit.	8.5	Percentage of workers who work 49 hours or more per week	Ministry of Health, Labour and Welfare			
Creation of a society with dynamic engagement of all citizens: Dream-weaving childcare support	To attain the "desired birthrate of 1.8," create a society where as many young people as possible can fulfill their hopes for marriage and childbirth and can raise their children with peace of mind, and where all children can have ambitions and work to make their dreams come true.	4 5 8 10	Indicators set in the Japan's Plan for Dynamic Engagement of All Citizens	Cabinet Secretariat and others			
(Children)  Promotion of child poverty countermeasures	Promote child poverty countermeasures in a comprehensive manner based on the General Principles of Policy on Poverty among Children, which was decided by the Cabinet in August 2014.	1.2	Indicators set in the General Principles of Policy on Poverty among Children	Cabinet Office and others			
Promotion of employment measures for young people	Based on Japan's Plan for Dynamic Engagement of All Citizens, foster the steady implementation of the Act for Employment Promotion etc. of Youth (enacted in 2015) and foster the employment of young people to provide them with more opportunities to effectively demonstrate their abilities.	8.5	Percentage of involuntary non-regular workers (aged 25 to 34)	Ministry of Health, Labour and Welfare			
(Women) Promote gender equality and women's empowerment	Based on the 4th Basic Plan for Gender Equality (approved by the Cabinet in December 2015), the government enhance systems for promoting gender	5	Achievement levels of the 71 performance objectives in implementation of the plan and	Cabinet Office and others			

(Education) Enhancement of elementary and secondary education	equality in the following priority fields.  1. Reformation of "men-oriented working styles" for women's empowerment  2. Expansion of women's participation in policy decision-making processes  3. Securing equal opportunities and treatment between men and women and work-life balance  4. Promoting gender equality in regional communities, agricultural, forestry and fishery communities, and in the field of the environment  5. Gender equality in science and technology and academic fields  6. Support for women's lifelong health  7. Elimination of all forms of violence against women  8. Creation of an environment in which people facing poverty, aging, disabilities can lead secure lives  9. Consolidation of the social systems based on the perspective of gender equality  10. Awareness-raising on gender equality through education and media  11. Establishing disaster risk management and reconstruction system from the perspective of gender equality  12. International collaboration and contribution on gender equality  Give support to children in completing elementary and secondary education to ensure equal opportunities in education. Revise and implement the national curriculum standards to provide children with a sufficient level of education throughout the country and help them foster competency required for the new era. Also to this end, improve the quality and abilities of teachers and enhance the allocation of teacher and other staffs.	4.1	in 12 priority fields of the 4th Basic Plan for Gender Equality  (1) Upper secondary graduation rates (2) Decrease in the number of students positioned in the lower learning groups in international student assessment surveys (3) Increase of learning motivation and improvement	Ministry of Education, Culture, Sports, Science and Technology
Enhancement of early childhood education	Early childhood education provides the foundation for the lifelong development of personality and it is therefore critical to provide all children with opportunities to receive high-quality early childhood education regardless of the economic situations of their households. Accordingly, work to step by step make early childhood education free of	4.2	students (1) Percentage of children attending kindergarten and others (2) Percentage of children receiving free-of-charge childcare	Ministry of Education, Culture, Sports, Science and Technology
Enhancement of higher education	charge while also improving the quality.  In light of the importance of developing highly skilled human resources at higher education institutions, provide highly motivated and talented students with opportunities to receive higher education by means of establishing a grant-type scholarship scheme and other economic assistance, while enhancing support to students in general and also providing people already working in society with second learning opportunities at universities, professional training college and others.	4.3	(1) Percentage of students who enter higher education institutions (2) Expansion of systems to allow students to receive education on a part-time basis at universities and systems to enable those already working in society to attend and complete courses of learning (3) Greater adult student enrollment in universities, junior colleges, and specialized	and others  Ministry of Education, Culture, Sports, Science and Technology and others

Enhancement of career education and vocational education and practical and academic knowledge and skills throughout their lifetimes.  In order to achieve this, enhancement of career education, improvement of internship projects, and collaboration between education and employment are required to avoid job mismatching.  Promotion of education to meet special needs and provision of education and learning opportunities to foster gender equal to foster gender equality  Promotion of a learning opportunities to foster gender equality  Creation of a society with dynamic engagement of all carning options.  Protection of a society with dynamic engagement of all critizens: Social security system to create a society in which people have no choice but to leave their jobs in order to grace proform the 10 social security system to create a society in which people can use desirable nursing care services, provide missing care reform the 10 social security system to create a society in which people can use desirable nursing care services, provide missing care with working, and lead long and healthy lives with peace of mind.  (Persons with disabilities)  In addition to raising basic and general abilities that experiences in workplace and internship projects in secondary schools, universities, junior colleges, colleges of technology, and specialized training colleges, etc.  (2)Creater adult student universities, junior colleges, etc.  (3) (1) Precentage of individual deducational subtractivational subtracties, labalities at early childhood and elementary
Enhancement of career education and vocational education and every provide a foundation for social and vocational independence, we will prepare opportunities in which students can correspond to the mobilization of the labor market and gain practical and academic knowledge and skills throughout their lifetimes.  In order to achieve this, enhancement of career education, improvement of internship projects, and collaboration between education and employment are required to avoid job mismatching.  Promotion of education and employment are required to avoid job mismatching.  Promotion of education and employment are required to avoid job mismatching.  Promotion of educational and given to them. Also, for the creation of a gender equal society, foster gender equality at schools and in households and learning opportunities to foster gender equality a schools and in households and learning options.  Creation of a society with disabilities and personal characteristics. To this end, improve and enhance the content and methods of education and learning opportunities and learning opportunities to foster gender equality at schools and in households and local communities, and increase educational and learning options.  Creation of a society with disabilities at transport of eliminating cases in which geople have no choice but to leave their jobs in order to engagement of all provide family members with nursing care, reform the social security system to create a society in which people can use desirable nursing care services, provide nursing care with working, and lead long and healthy lives with peace of mind. # **3.** Creating Growth Market, Revitalization of Rural Areas, and Promoting Technological Innovation

SDGs that are considered to be particularly relevant: SDGs 2 (Food), 8 (Economic growth and employment),

9 (Infrastructure, industrialization and innovation), and 11 (Sustainable cities and human settlements)

(Toward "the Nominal GDP of 600 Trillion Yen")	Outline of the measures	Target	Indicator	Related governmental agency
-	's Plan for Dynamic Engagement of All Citizens, impl	ement the follo	wing measures to create a socie	ety in which all
citizens are dynami	cally engaged.			
A robust economy	(1)Enable a diverse array of people to make full use of	8	Indicators set in Japan's Plan	Cabinet
that gives rise to	their abilities through eliminating social loss,	9	for Dynamic Engagement of	Secretariat and
hope	supporting employment, education, and etc.	11	All Citizens	others
	(2) A. Under strong control tower functions that mobilize			
	industry, academia, and government, formulate strategies			
	for research and development, create new business			
	models and foster the Fourth Industrial Revolution.			
	(2) B. Move forward with initiatives to address the			
	Fourth Industrial Revolution through the thorough use of			
	IT and by ensuring cybersecurity.			
	(2)C. In order to respond to the Age of the Fourth			
	Industrial Revolution, press ahead with regulatory &			
	institutional reforms and promoting ""growth-oriented			
	management.			
	(3) A. Promote university reforms & enhance the			
	functions of research & development agencies. Also			
	promote world-class academic-industrial collaboration.			
	(3) B. Build a comprehensive system to enbale relevant			
	government organization to identify startup companies,			
	including in those in provincial regions, and connect			
	startups to global markets.			
	(4) A. To develop human resources who can adapt to the			
	Age of the Fourth Industrial Revolution, promote the			
	nationwide deployment of IT-based education, the			
	enhancement of science, mathematics, and IT education.			
	(4) B. To attract excellent foreign human resources to Japan, develop appealing acceptance mechanisms &			
	environments.			
	(5) A. Improve the quality and productivity of healthcare			
	and nursing care and create diverse services not covered			
	by public health insurance thereby ensuring the quality			
	of life of citizens.			
	(5) B. By reinforcing efforts in the energy and			
	environmental fields such as energy saving, renewable			
	energy and natural resources, realize economic growth			
	and greenhouse gas emission reduction control at the			
	same time.			
	(5) C. Develop the sports industry in Japan by (1)			
	establishing a self-sustaining virtuous cycle model			
	whereby earnings will be reinvested in sports, and (2)			
	creating new sports markets.			
	(5) D. Establish an existing housing transaction market			
	where housing will be evaluated as assets. Promote			

dissemination of next-generation housing.
(5) E. Realize, execute, and evolve the New Robot
Strategy, while also accelerating introduction of robots in
mid-sized enterprises and SMEs and improving the
environment for R&D and demonstration tests.
(6) Push forward to achieve the early enforcement of
the Trans-Pacific Partnership (TPP) and promote
negotiations on economic partnerships and
conclusion/amendment of investment agreements,
thereby establishing a platform for global economic
activities.
(7) Encourage efforts of each motivated business to
improve its productivity through support from the
national government, trade associations, organizations of
SMEs and financial institutions in regions.
(8) Improve productivity and the export capacities of
agriculture, forestry and fisheries, by utilizing excellent
knowledge obtained from related sectors and
strengthening the production base in communities
including those in hilly and mountainous areas.
(9) Carry out comprehensive and strategic measures
toward realization of Japan as a tourism-oriented
advanced country through government-wide and
government-public collaborative efforts.
(10) Promote opening up of public services and assets to
the private sector.
(11) Support local SMEs' overseas business expansion.
Strengthen their management base and promote
development of local consultation systems.
(12) Promote measures for regional reinvigoration and
correct the excess concentration of population in the
Tokyo Metropolitan area, enable young people to have
jobs and families and resolve problems unique to each
local area, thereby overcoming the problems of
population decline and diminishing local economies.
(13) Facilitate the development of social infrastructure,
and build a nation resilient to disasters. Change the urban
structure to a sustainable one and promote PPP/PFI for
the development and operation of public facilities.
(14) Encourage the transfer of current record high
corporate earnings to workers as wages to ensure a
virtuous cycle of economy wherein wage hikes expand
er e

## 6. Conservation of Environment, including Biodiversity, Forests and Oceans

SDGs that are considered to be particularly relevant:

SDGs 2 (Food), 3 (Health), 14 (Oceans), and 15 (Biodiversity)

(Environmental conservation)	Outline of the measures	Target	Indicator	Related governmental agency
Measures for	Properly enforce the Act on the Evaluation of	3.9	(1) Achievement rates for the	Ministry of
chemicals	Chemical Substances and Regulation of Their	6.3	environmental criteria and	Economy,
management	Manufacture, etc. and the Act on Confirmation, etc. of	12.4	others	Trade and
	Release Amounts of Specific Chemical Substances in the		(2) Situation concerning the	Industry and
	Environment and Promotion of Improvements to the		implementation of	Ministry of the
	Management Thereof, and prepare for the enforcement		environmental surveys and	Environment
	of the Act on Preventing Environmental Pollution of		monitoring	
	Mercury, also conducting "the Japan Environment and		(3) Trends in concentrations of	
	Children's Study (JECS)" which is a national birth		long-term monitored	
	cohort study and responce to emerging and unsolved		substances, such as persistent	
	issues on chemicals, etc.		organic pollutants (POPs)	
			(4) Pollutant Release and	
			Transfer subject to PRTR	
			(5) Situation concerning the	
			implementation of screening	
			and risk assessment based on	
			the Act on the Evaluation of	
			Chemical Substances and	
			Regulation of Their	
			Manufacture, etc.	

Measures to prevent	Continue to monitor air environment across the country,	3.9	Achievement rates for the	Ministry of the
air pollution	while implementing measures to prevent the dispersal		environmental quality	Environment
	of asbestos as well as measures to reduce emissions from		standards and others	
	stationary sources such as factories and business sites			
	and from mobile sources such as cars.			
Measures against	(1) Promoting such actions as conducting research on,	14.1	(1) Appropriate enforcement of	Ministry of the
marine debris and	taking preventive measures of, and implementing		the Act on Prevention of	Environment
marine pollution	removal of marine debris including microplastics based		Marine Pollution and Maritime	and others
	on the Marine Debris Law.		Disaster: Amount of wastes or	
	(2) Implementing measures to reduce the amount of		other matter from land-based	
	wastes or other matter dumped at sea based on the Act		activities dumped at sea (unit:	
	on Prevention of Marine Pollution and Maritime		10,000 tons)	
	Disaster. Implementing monitoring of the marine		(2) Reduction of total pollutant	
	environment with a view to understanding the actual		load: Achievement rates for	
	conditions of the marine environment surrounding		environmental criteria on water	
	Japan.		quality in enclosed coastal seas	
	(3) Reduce the total pollutant load for COD, total		(for COD, total nitrogen and	
	nitrogen and total phosphorous in enclosed coastal seas		total phosphorous)	
	(Tokyo Bay, Ise Bay and Seto Inland Sea).			

(Biodiversity and marine and land resources)	Outline of the measures	Target	Indicator	Related governmental agency
Promotion of R&D	In line with the Basic Plan on Ocean Policy (decided by	14.2	Enhancement of marine	Ministry of
and marine surveys	the Cabinet in April 2013) and the 5th Science and	14.3	observation networks to take	Education,
for oceanographic	Technology Basic Plan (decided by the Cabinet in		ecosystem-based approaches	Culture,
science and	January 2016), continue to enhance oceanographic		and collect information about	Sports,

## $\bf 8.$ Strengthening the Means and Frameworks of the Implementation of the SDGs

SDGs that are considered to be particularly relevant: SDGs 17 (Means)

#### **Domestic measures**

(Multi-stakeholder partnership)	Outline of the measures	Target	Indicator	Related governmental agency
Participation of more citizens and companies in the private sector in the initiatives to achieve the SDGs	Hold a roundtable meeting to encourage more citizens and companies in the private sector to participate in the initiatives to achieve the SDGs in Japan and abroad.	17.17	Number of roundtable meetings held	Ministry of Foreign Affairs and others
Organization of a stakeholders' meeting on environmental dimension of SDGs	Start holding a stakeholders' meeting in 2016 as a forum to share information about advanced activities, recognize mutual activities, and further foster measures to raise public awareness and implement environmental dimension of the SDGs.	17.7	Number of stakeholders' meetings held	Ministry of the Environment
Establishment and organization of the Special Committee for the Promotion of SDGs under the Japanese National Commission for UNESCO	Discuss further measures to achieve the SDGs, which are related to Education, Science and Technology, at the Japanese National Commission for UNESCO.	17.17	Number of meetings of the Special Committee for the Promotion of SDGs under the Japanese National Commission for UNESCO held	Ministry of Education, Culture, Sports, Science and Technology

(Mainstreaming SDGs in international cooperation)	Outline of the measures	Target	Indicator	Related governmental agency
Implementation of development cooperation projects based on the Development Cooperation Charter	The Development Cooperation Charter was decided by the Cabinet in 2015 as the guiding principle of Japan's development cooperation so as to meet the needs of new era after the adoption of the 2030 Agenda for Sustainable Development. Based on the Charter, development cooperation is implemented with a particular focus on (1) eradication of poverty through quality growth, (2) sharing universal values and, realizing a peaceful and stable society and (3) building a sustainable and resilient international community through efforts to address global challenges.			
Mainstreaming SDGs in Development Cooperation	Incorporate the perspective of contribution to achieving SDGs in country assistance policy for developing countries.	17	Number of country assistance policy which is formed by incorporating the perspective of contribution to achieving SDGs	Ministry of Foreign Affairs
	In new bilateral development cooperation projects (loans,grant aid (including the Grant Assistance for Japanese NGO Projects), and technicial cooperation), promote project formation aimed at contribution to SDGs from the planning stage. In addition, evaluate the results of development cooperation projects from the perspective of SDGs.		Number of projects made in consideration of SDGs	Ministry of Foreign Affairs and JICA
	Take into account the contributions to SDGs in the international organization evaluation processes related to development cooperation projects.		Take into account the contributions to SDGs in assessing influence and contribution in each specialized field of international organizations related to development cooperation	Ministry of Foreign Affairs

	Conduct third-party evaluations on the SDGs-related ODA policies in view of SDG's each goal and feed the results back to ODA policies.		Number of recommendations related to SDG's each goal in the third-party ODA evaluations.	Ministry of Foreign Affairs
Further cooperation with international organizations based on the Human Security Approach	To visualize the Human Security Approach, implement model projects by making monetary contributions to international organizations, and enhance PR activities.	17	Number of model projects made	Ministry of Foreign Affairs
Implementation of ODA through public-private partnership	Cooperate more effectively with Japanese companies including SMEs, local governments, universities, research institutes, and others to help developing countries develop human resources, establish infrastructure systems, and improve the environment to foster international trade and investments.	17.17	Number of projects adopted, which also contribute to the overseas expansion of companies including SMEs and local governments	Ministry of Foreign Affairs and JICA
Promoting humanitarian and development nexus	Formulate bilateral and multirateral cooperation projects to tackle humanitarian crisis including assistance for refugee and IDPs, with humanitarian and development nexus approach	17	Number of model projects implemented	Ministry of Foreign Affairs

(Support for the establishment of implementation systems for SDGs)	Outline of the measures	Target	Indicator	Related governmental agency
