### **Indicator Name, Target and Goal**

**Indicator 17.13.1** Macroeconomic Dashboard

**Target 17.13** Enhance global macroeconomic stability, including through policy coordination and policy coherence

**Goal 17** Strengthen the means of implementation and revitalize the global partnership for sustainable development

### **Foreign Direct Investment, Net Inflows (% of GDP)**

#### **Definition and Rationale**

##### Definition

This indicator shows net inward direct investment that is calculated as execution net of withdrawal of investment in Japan.

Unit: 100 million yen

##### Concepts

Direct investment is cross-border investment associated with an investor having control or a significant degree of influence on the management of a foreign enterprise (direct investment enterprise). Direct investment enterprise is defined as a corporation or other entity in which the investor has 10% or more of voting power.

##### Rationale and Interpretation:

To provide a standardized instrument to monitor the macroeconomic stability of countries, the World Bank has designed a Macroeconomic dashboard including important macroeconomic indicators covering the external, financial, fiscal, and real sectors. The indicator selection builds on existing macroeconomic monitoring frameworks developed and used by international and regional agencies, such as IMF, WB, ECB, and OECD.

#### **Data Sources and Collection Method**

Based on Balance of Payments Statistics from the Ministry of Finance

## **Method of Computation and Other Methodological Considerations**

### **○ Computation Method**

The accounting method is based on the sixth edition of the Balance of Payments and International Investment Position Manual published by the International Monetary Fund (IMF). The data are compiled according to the directional principle.

### **○ Comments and limitations**

The figures show the actual amount instead of % of GDP. Figures that have been published in the "Balance of Payments Statistics" are provided.
