

Indicator 17.13.1

Indicator Name, Target and Goal

Indicator 17.13.1 Macroeconomic Dashboard

Target 17.13 Enhance global macroeconomic stability, including through policy coordination and policy coherence

Goal 17 Strengthen the means of implementation and revitalize the global partnership for sustainable development

Exports of Goods and Services (annual % change)

Definition and Rationale

Definition

The “exports of goods and services (annual % change)” is calculated from the rate of change in the sum total between two consecutive fiscal terms.

Concepts

The year-on-year growth rate of the export of goods and services.

Rationale and Interpretation:

To provide a standardized instrument to monitor the macroeconomic stability of countries, the World Bank has designed a Macroeconomic dashboard including important macroeconomic indicators covering the external, financial, fiscal, and real sectors. The indicator selection builds on existing macroeconomic monitoring frameworks developed and used by international and regional agencies, such as IMF, WB, ECB, and OECD.

Data Sources and Collection Method

Based on the Cabinet Office’s National Accounts of Japan

Method of Computation and Other Methodological Considerations

Computation Method

(Exports of goods and services in a given year / exports of goods and services in the preceding year) × 100

Comments and limitations

None

Data Disaggregation

None
