APEC Business Travel Card (ABTC)

- The ABTC provides streamlined processing for business people and improves border integrity as travellers are pre-cleared.
- With a single application the ABTC provides:
 - pre-cleared travel for all participating economies (no need for individual visa applications)
 - multiple entries for stays of up to 90 days
 - access to special APEC lanes
 - three years validity

Advance Passenger Information

- API systems improve both passenger security & passenger facilitation.
- API systems provide advance notification of travellers' details to border control agencies. This enables faster processing and greater integrity checks.
- Australia's API system (APP) is used to prevent the boarding of persons of concern at the time of check-in.
- API systems can be developed to meet the specific needs of individual countries.
