

# <JAPAN'S CONCRETE ACTIONS TOWARDS STRENGTHENED INTERNATIONAL ENERGY SECURITY>

To achieve both enhancement of energy security and sustainable development, Japan will, in cooperation with G8 and other countries; (i) make the most of Japanese technologies and know-how on energy saving and renewable energy, (ii) pursue harmonization of resource use and environmental conservation, such as 3R's Initiative, and (iii) stabilize energy supply through international coordination.

- Enhancement of energy security
- Sustainable development

CONFIDENCE

Stabilization of energy supply through international coordination

TECHNOLOGY

Make the most of Japanese technologies and know-how on energy saving and renewable energy, etc.

PARTICIPATION

Harmonization of resource use and environmental conservation, such as 3R's Initiative

3R's Initiative = Reduce, Reuse and Recycle

Realization of broad participation
