

Outline of the G7 Transport Ministers' Meeting in Ise-Shima, Mie

In view of **the introduction and diffusion of innovation, accessibility and sustainability**, discussions will be held on **transport policy for the new economy and society in this era of recovery from the Covid pandemic and beyond**. We will contribute worldwide by globally promoting its technical innovations and cutting-edge undertakings.

About the meeting

- Date: June 16 (Fri.) - 18 (Sun.), 2023
- Venue: Shima Kanko Hotel in Shima City, Mie Prefecture

The Ise-Shima region boasts beautiful natural settings and numerous historical attractions, represented by Ise Shrine. Taking this opportunity, we would like to introduce the Ise-Shima's and Japan's rich tourism resources to the world.

Topic: Achieving Accessible and Sustainable Transportation through Innovation

- Confirming the importance of securing sustainable regional mobility and transport, including in depopulated areas and of securing equitable, safe, smooth mobility irrespective of age, disability or gender difference. Discussions will be held on the role of government in leading policy innovation and technological development by the private sector to realize such mobility and transport.
- Confirming the importance of cooperation by the international community and of the direction of efforts to reduce greenhouse gas emissions from the transport sector in order to achieve the 1.5°C target set out in the Paris Agreement. We will discuss the introduction and dissemination of innovation and the role of governments to achieve this goal.
