

Japan`s Fast-Start Financing for Developing Countries up to 2012

Objective

Assist developing countries, especially those making efforts to reduce emission and/or being particularly vulnerable to climate change.

taking into account the developments in the negotiations and revival situations in internal economy

Type of Assistance

Official Development Assistance (ODA)
(Approx. **7.2 billion dollars**)

- Grant Aid, Technical Cooperation
- ODA Loan (Concessional loan)
- Contribution to Multilateral Funds

Other Official Flow
(Approx. **7.8 billion dollars**)

- Other Official Financing in collaboration with private sector
eg. Japan Bank of International Cooperation (JBIC) financing

TOTAL: 15 billion dollars

9.77 billion dollars (@1\$= ¥ 115)

of assistance already being implemented to date (As of 31 March, 2011)

Note 1: public financing 6.84 billion + private financing 2.93 billion(only for mitigation project)

Note 2: 511 projects have been implemented in as many as 95 countries until Mar. in 2011.

Note 3: Based on the needs of vulnerable countries. For example, the Grant Aid is following :Mitigation(other than REDD+) 23%, REDD+ 13%, Adaptation 37%, Mitigation/Adaptation 27%

Note 4: The assistance to developing countries being vulnerable to climate changes is Africa (1233 million), LDCs (643 million) and SIDS (69 million).

Areas of Assistance

Mitigation: \$7.99 billion (Grant: 0.50 billion, Loan 2.96 billion, OOF 4.53 billion)

Assisting developing countries in their efforts to reduce emissions in such areas as climate change policy formulation and promotion of renewable energy (eg. wind, geothermal, and solar energy).

Eg) Wind Energy Projects (\$338 million)

Geothermal Energy Projects (2 Countries, \$491 million)

Solar Energy Projects (33 Countries, \$179 million)

REDD+: \$313 million (Grant: 184 million, Loan 124 million)

Assisting developing countries to conduct survey of forest resources and formulate forest management plan to promote sustainable usage and preserve forests

Eg) Forest Preservation Programs (21 Countries, \$158 million)

Contribution to UN-REDD(\$3 million)

Adaptation: \$742 million (Grant: 527 million, Loan 214 million)

Strengthening developing countries' capability to cope with natural disasters caused by climate change. Providing necessary equipment and facilities to take precaution against and to recover from damages caused by disasters.

Eg) Program for the Improvement of Capabilities to cope with Natural Disasters

Caused by Climate Change (25 Countries, \$164 million)

Infrastructure Rehabilitation projects for typhoon damage (\$86 million)

Mitigation&Adaptation: \$1033 million (Grant: 382 million, Loan 649 million)

Contribution to Climate Investment Funds (CIF) (\$322 million) and others.
