Yokohama Action Plan	Proposed Measures by Japan/Implementing Partners	Implementing Partners	Potential Resources, Possible Contributions	Current Status of Implementation
1.Pillar (Boosting Economic Growth, Achieving MDGs, Consolidation of Peace, Good Governance, Addressing Environment/Climate Change Issues, Broadening Partnership)				
Community Development, Education, Health, etc.)				
1-1-1. Actions to be taken in the next 5 years under the TICAD Process				
Individual Action ① ② . . .	Individual proposed measure	Name of implementing partner	Individual potential resource, possible contribution	•Year •Country •Status <i>Provide the information on the current status of implementation of each potential measure for 2009 including the data on "Reporting Year", "Country" (for which the assistance is provided or where the assistance is implemented), and "Status". Budget (Planned or Implemented) information is encouraged to be included where possible, as well as the information on the concrete "output" such as the number of benefited population, any statistical data if possible.</i> <i>The description of the "Current Status of Implementation" should be clear, concrete and concise and kept around 5-7 lines in total. If your country/organization/agency would like to provide more information, please create and paste the link to the additional source of information such as your HP by indicating as [more information].</i>

IFAD Programmes, Projects and Grants approved in 2009

Yokohama Action Plan	Proposed Measures by Japan/Implementing Partners	Implementing Partners	Potential Resources, Possible Contributions	Current Status of Implementation
BOOSTING ECONOMIC GROWTH: Infrastructure				
	Rural Access Project Sudan	IFAD	Total project cost estimated at US\$15.0 million <u>IFAD</u> Debt sustainability grant amount: SDR 8.2 million (approximately US\$13.0 million) beneficiaries US\$90,000, and national government US\$1.9 million	The project will help poor rural people living in the Butana area gain improved access to markets and social services. It will upgrade about 144 kilometres of rural roads and train communities to manage road tolls and to engage in labour-based maintenance contracts. It will strengthen state capacity to plan, design, supervise, manage and maintain rural feeder roads using the 'spot improvement' approach, which means improving trouble spots that make the road impassable or dangerous Approximate reach: 15,000 households Directly supervised by IFAD
BOOSTING ECONOMIC GROWTH: Assist Private Sector Development				
	Rural Business Development Services Programme Burkina Faso	IFAD	Total programme cost estimated at US\$25.2 million <u>IFAD</u> Loan amount: SDR 5.4 million (approximately US\$8.1 million) on highly concessional terms Debt sustainability grant amount: SDR 5.4 million (approximately US\$8.1 million) BOAD US\$5.1 million, beneficiaries US\$100,000, and national government US\$3.9 million	The programme will build on and scale up the achievements of the highly successful IFAD-funded Rural Microenterprise Support Project, which closed at the end of 2008. It will work with microenterprises and small and medium-sized businesses to continue to build the newly emerging business services sector. This sector is crucial for microenterprise development and offers opportunities to the country's microentrepreneurs, particularly young people and women. Approximate reach: 12,000 households Directly supervised by IFAD
	Smallholder Agribusiness Promotion Programme Zambia	IFAD	Total programme cost estimated at US\$23.5 million <u>IFAD</u> Loan amount: SDR 12.9 million (approximately US\$20.0 million) on highly concessional terms beneficiaries will provide US\$2.0 million, and national government US\$1.5 million	The programme will increase the incomes of about 24,000 poor rural households that produce and trade agricultural commodities by increasing the volume and value of their agribusinesses. Of these small-scale farmers, 80 per cent are poor and more than half are women. They are already engaged in some market-oriented production but need help to improve their market operations, diversify production and add value to their produce. Approximate reach: 24,000 households Directly supervised by IFAD
	African Agriculture Fund Initiative	IFAD/AFD/African Development Bank/Alliance for the Green Revolution in Africa/Banque de Développement Ouest-Africaine. Key partners are also the Development Bank of South Africa, German DEG/KfW, the Finnish Fund, the International Finance Corporation and other financial institutions.	Total programme cost (to date) US\$ 120 million (the first formal closing summer 2010) <u>IFAD</u> : grant of US\$ 200,000 (covering costs of the design of the Technical Assistance Facility of the AAF)	The African Agriculture Fund (AAF) is a public-private equity investment fund targeted to support the agriculture sector (focused on food production) in Africa. IFAD's goal is to enable small-holder farmers, producers' associations and small-size agribusiness enterprises to access the resources of the AAF. To make this possible IFAD has promoted the design of a specific grant-basis financing window of the AAF (the Technical Assistance Facility/TAF) and is actively involved in setting up and mobilising resources (grants) to finance the Technical Assistance Facility. By making available equity funds, the AAF will strengthen the financial structures of private agricultural enterprises and cooperatives. Consequently it will also enhance investees' investment programmes, enabling them to modernize infrastructure and increase and diversify products
BOOSTING ECONOMIC GROWTH: Agriculture and Rural Development				
	Rural Economic Growth Support Project Benin	IFAD	Total project cost estimated at US\$47.8 million <u>IFAD</u> Loan amount: SDR 6.0 million (approximately US\$9.0 million) on highly concessional terms Debt sustainability grant amount: SDR 6.0 million (approximately US\$9.0 million) West African Development Bank (BOAD) US\$9.1 million, United Nations Development Programme (UNDP) US\$3.0 million, Food and Agriculture Organization of the United Nations (FAO) US\$500,000, financial institutions US\$9.9 million, beneficiaries US\$2.9 million, and national government US\$4.4 million	The overall goal of this nationwide project is to reduce poverty and support sustainable rural economic growth by promoting agricultural value chains and improving rural infrastructure. It will help Benin's small-scale rural producers develop well-integrated value chains for four non-cotton crops: roots and tubers, lowland rice, vegetables and pineapples. Approximate reach: 12,000 households Directly supervised by IFAD
	Pastoral Water and Resource Management Project in Sahelian Areas Chad	IFAD	Total project cost estimated at US\$39.5 million <u>IFAD</u> Debt sustainability grant amount: SDR 12.6 million (approximately US\$19.5 million) Agence Française de Développement: €11.0 million (grant, approximately US\$14.2 million); the Swiss Agency for Development and Cooperation: US\$2.7 million (grant); beneficiaries US\$600,000; and national government: US\$2.5 million	Chad has abundant pastoral areas but people do not use them fully because there are too few water points. The project is expected to be launched in April 2010. It will set up an infrastructure of water points that will enable mobile pastoral communities to use more of the available pastoral land. Productivity will increase through reduced livestock mortality, morbidity and water stress as well as through higher live weight and milk production. Approximate reach: 32,000 households Directly supervised by IFAD
	Agricultural Rehabilitation and Poverty Reduction Project Côte d'Ivoire	IFAD	Total project cost: estimated at US\$25.6 million <u>IFAD</u> Debt sustainability grant amount: SDR 6.3 million (approximately US\$10.0 million) BOAD will provide US\$12.7 million, and national government US\$3.0 million	This primarily post-conflict project focuses on re-establishing and increasing the production of rice, cassava and yam, due to their importance in the food security strategies of poor households. The project will replace the assets that destitute households lost during the conflict. It will also support short-term recovery of rural communities and farming systems. At the same time, it will lay the basis for long-term rehabilitation and participatory development. Approximate reach: 21,000 households Directly supervised by IFAD
	Livestock and Horticulture Development Project Gambia	IFAD	Total project cost: estimated at US\$16.0 million <u>IFAD</u> Debt sustainability grant amount: SDR 5.1 million (approximately US\$8.0 million) African Development Bank (AfDB) through the African Development Fund US\$5.0 million, beneficiaries US\$2.2 million, and national government US\$810,000	The project reflects the emphasis placed by IFAD's country strategic opportunities programme (COSOP) on helping small-scale rural producers – especially women and young people – expand their range of profitable economic activities. By supporting horticulture and livestock products, the project will also contribute to replacing expensive food imports with local products from rural areas and boosting household and community-level food security. Approximate reach: 3,000 households Directly supervised by IFAD
	Agriculture Sector Rehabilitation Project Liberia	IFAD	Total project cost: US\$24.3 million <u>IFAD</u> Debt sustainability grant amount: SDR 3.2 million (approximately US\$5.0 million) AfDB through the African Development Fund US\$17.6 million, the Fragile States Facility US\$720,000, beneficiaries US\$410,000, and national government US\$580,000	Liberia is recovering from a 14-year civil war that has left 86 per cent of the country's rural households living in poverty and 80 per cent of these food insecure. The project will channel direct benefits to vulnerable beneficiary groups. It will also provide support for the short-term recovery of rural communities and their farming systems, while laying the foundations for long-term rehabilitation and participatory development. Approximate reach: 10,000 households Directly supervised by IFAD

IFAD Programmes, Projects and Grants approved in 2009

Yokohama Action Plan	Proposed Measures by Japan/Implementing Partners	Implementing Partners	Potential Resources, Possible Contributions	Current Status of Implementation
	Rural Microfinance Programme Mali	IFAD	Total programme cost estimated at US\$30.8 million <u>IFAD</u> Loan amount: SDR 17.1 million (approximately US\$25.0 million) on highly concessional terms United Nations Capital Development Fund US\$1.0 million, UNDP US\$460,000, beneficiaries US\$590,000, and national government US\$3.7 million	The programme will consolidate three existing, IFAD-supported microfinance networks in an area in the central-western part of Mali. Some 94 credit unions are now part of these networks and have financed income-generating activities for more than 40,000 people. The new programme will strengthen the sustainability of the existing credit unions and consolidate the existing networks, restructuring where necessary and identifying new products. Approximate reach: 75,000 households Directly supervised by IFAD
	Value Chains Development Programme for Poverty Reduction Mauritania	IFAD	Total programme cost: estimated at US\$17.8 million, <u>IFAD</u> Loan amount: SDR 3.9 million (approximately US\$6.0 million) on highly concessional terms Debt sustainability grant amount: SDR 3.9 million (approximately US\$6.0 million) Facility to Support Rural Finance will provide US\$2.0 million, beneficiaries US\$1.2 million, and national government US\$2.6 million	The programme will promote growth by developing agricultural value chains for vegetables, dates, milk, poultry, skins and hides, red meat and non-timber forest products. Adding value to these goods will achieve the double objectives of fighting poverty and increasing national production, thus reducing the country's reliance on food imports and their vulnerability to imported food price increases. Approximate reach: 10,000 households Directly supervised by IFAD
	Agricultural Intensification and Value-enhancing Support Project Burundi	IFAD	Total project cost: estimated at US\$31.6 million <u>IFAD</u> Debt sustainability grant amount: SDR 9.3 million (approximately US\$13.6 million) World Food Programme US\$4.7 million, European Union US\$6.0 million, potential cofinancier US\$2.5 million, beneficiaries US\$1.4 million, and national government US\$3.5 million	Designed to help combat poverty among the country's most vulnerable groups, the project will build the capacity of poor small-scale hillside and marshland farmers to improve household nutrition and increase their productivity, assets and incomes. It will also support public and private institutions and organizations of poor rural people, improve access to markets and help producers' organizations add value to their produce. Approximate reach: 30,000 households Directly supervised by IFAD
	Community-based Integrated Natural Resources Management Project Ethiopia	IFAD	Total project cost estimated at US\$25.4 million <u>IFAD</u> Loan amount: SDR 4.4 million (approximately US\$6.6 million) on highly concessional terms Debt sustainability grant amount: SDR 4.4 million (approximately US\$6.6 million) Global Environment Facility (GEF) US\$4.4 million, beneficiaries US\$5.1 million, and national government US\$2.7 million	The project will help poor rural people gain better access to natural resources such as land and water, and to improved technologies for agricultural production, mainly through sustainable land management. It will also establish and strengthen community-based organizations, and promote employment opportunities outside agriculture with the aim of relieving pressure on marginal lands. Approximate reach: 450,000 households Directly supervised by IFAD
	On-farm Irrigation Development Project in the Oldlands Egypt	IFAD	Total project cost estimated at US\$72.1 million <u>IFAD</u> Loan amount: SDR 29.6 million (approximately US\$47.0 million) on intermediate terms Grant: SDR 630,000 (approximately US\$1.0 million) Beneficiaries US\$8.8 million, and national government US\$15.3 million	The project will work with smallholders, landless labourers, unemployed young people, and women household heads. The objective is to improve the livelihoods of the participants by improving on-farm water-use efficiency and agricultural productivity. It will also promote employment by supporting small businesses and microenterprises and offering marketing support for farm and non-farm products. Approximate reach: 79,000 households Directly supervised by IFAD
	Revitalizing The Sudan Gum Arabic Production and Marketing Project Sudan	IFAD	Total project cost estimated at US\$10.9 million <u>IFAD</u> Debt sustainability grant amount: SDR 1.9 million (approximately US\$3.0 million) Multi-Donor Trust Fund US\$7.0 million, beneficiaries US\$500,000, and national government US\$380,000	The project will improve the production and marketing systems of small-scale acacia gum Arabic producers. It will implement sector reform, which will create equal opportunity and competition among all market actors. It will also strengthen the organization and capacity of the gum arabic producers' associations to improve their bargaining position. Approximate reach: 3,000 households Cooperating institution: World Bank
	Mainstreaming Pro-Poor Fertilizer Access and Innovative Practices in West Africa	IFAD / International Fertilizer Development Center	Grant: US\$1.5 million	The programme will improve the livelihoods of poor farmers by introducing them to the appropriate use of organic, inorganic and sustainable use of fertilizers and organic resources to boost crop production.
	Programme for Improved Management of Agricultural Water in Eastern and Southern Africa - Phase II	IFAD / International Water Management Institute	Grant: US\$1.5 million	The overall goal of the programme is to enhance the development and poverty-reduction impacts of public and private investments in smallholder agricultural water management.
	Smallholder Agriculture Support Project Zimbabwe	IFAD/Africare	Grant: US\$500,000	The project will increase sustainable agricultural productivity of smallholder farmers in selected wards of Zvishavane district. This will lead to expanded agricultural employment opportunities, higher incomes, improved household food security, and increased resilience and improved livelihoods
	Programme for Impact Evaluation Approaches for Agricultural Research for Development	IFAD/Bioversity International	Grant: US\$1.0 million	The programme will help agricultural research and development organizations improve the way they evaluate the causes and impacts of poverty, which will contribute to better targeted, more effective projects.
	The Rural Hub: Supporting Rural Development and Food Security in Western and Central Africa	IFAD / Economic Community of West African States	Grant: US\$1.5 million	The goal is to reduce rural poverty by promoting more effective and inclusive agricultural and rural development policies, fostering policy dialogue, and supporting capacity-building and knowledge-sharing.
	Support for Formulating Voluntary Guidelines on Responsible Governance of Tenure of Land and Other Natural Resources Programme	IFAD/FAO	Grant: US\$1.36 million	The programme will facilitate a multi-stakeholder, participatory process for enhancing policy dialogue and developing voluntary guidelines on governance of land tenure and natural resources. Thus increasing awareness of the role of governance in reducing poverty.
	Enabling Sustainable Land Management, Resilient Pastoral Livelihoods and Poverty Reduction in Africa	IFAD/International Union for Conservation of Nature	Grant: US\$950,000	The programme will develop stronger and more widespread understanding of rangeland environments and pastoral livelihoods. It will improve the use of that knowledge to inform policy and practice.

IFAD Programmes, Projects and Grants approved in 2009

Yokohama Action Plan	Proposed Measures by Japan/Implementing Partners	Implementing Partners	Potential Resources, Possible Contributions	Current Status of Implementation
	Linking National Rice Development Strategies with the Growth and Poverty Reduction Strategies in Africa	IFAD / Coalition for Rice Development in Africa	Grant: US\$ 200,000	
	Putting a Pro-Poor Land Agenda into Practice at the national, regional and global levels	IFAD / International Land Coalition: Advancing the International Land Coalition's Strategic Framework:	Grant: US\$1.07 million	The programme will strengthen the capacities of the Coalition members and partners to more effectively empower resource-poor and landless people to gain and maintain secure access to land. It will also support processes that help establish pro-poor land policies at the national level.
ACHIEVING MDGs. ECONOMIC & SOCIAL DIMENSIONS OF HUMAN SECURITY: Community Development				
	Pastoral Community Development Project II Ethiopia		Total project cost estimated at US\$139.0 million <u>IFAD</u> Loan amount: SDR 12.6 million (approximately US\$19.5 million) on highly concessional terms Debt sustainability grant amount: SDR 12.6 million (approximately US\$19.5 million) International Development Agency (IDA) US\$80.0 million, beneficiaries US\$15.0 million, and national government US\$5.0 million	This is the second phase of a successful partnership between Ethiopia's pastoral communities, local and federal governments, the International Development Association and IFAD. It will improve the livelihoods of about 600,000 pastoral and agropastoral households by delivering basic social services, strengthening project participants' ability to withstand external shocks, and enhancing economic growth. It will also boost the institutional capacity of pastoral community organizations and local governments. Approximate reach: 600,000 households Jointly supervised by IDA and IFAD
	Support to Farmers' Organizations in Africa Programme	Eastern Africa Farmers' Federation, Subregional Platform for Farmers' Organizations of Central Africa, the Network of Farmers' Organizations and Agricultural Producers in West Africa, the Southern African Confederation of Agricultural Unions	Grant: US\$1.5 million	The programme's goal is to improve the livelihoods of poor rural producers by strengthening the capacity of farmers' organizations and increasing their role in developing and implementing policies and programmes related to agriculture.

Yokohama Action Plan	Proposed Measures by Japan/Implementing Partners	Implementing Partners	Potential Resources, Possible Contributions	Current Status of Implementation
ADDRESSING ENVIRONMENTAL/CLIMATE CHANGE ISSUES: Mitigation and Adaptation				
	Development Marketplace 2009: Climate Adaptation	IFAD / International Bank for Reconstruction and Development	Grant: US\$1.1 million	The overall goal is to develop and promote innovative, sustainable projects that enable poor rural communities, including indigenous peoples, to improve their ability to adapt to climate change. It will generate benefits through sustainable natural resource management measures and support actions that build on disaster risk management.
	Adaptation to Climate Change in Marginal Environments in West Asia and North Africa through Sustainable Crop and Livestock Diversification	IFAD / International Center for Biosaline Agriculture	Grant: US\$1.4 million	The goal is to increase incomes, improve livelihoods, and boost the resiliency to climate change of poor farmers who rely on marginal water and land resources. The programme will scale up and disseminate high-yielding forage and crop-production packages that are adapted to marginal environmental conditions.
	Mainstreaming Pro-Poor Livelihoods and Addressing Environmental Degradation with Bamboo in Eastern and Southern Africa Programme	IFAD/International Network for Bamboo and Rattan	Grant: US\$1.5 million	The programme is providing opportunities for rural off-farm employment and enterprise development. It will also address deforestation, poverty alleviation and energy issues by empowering rural men and women to manage natural resources sustainably.
