

FDI to ASEAN(by sector)

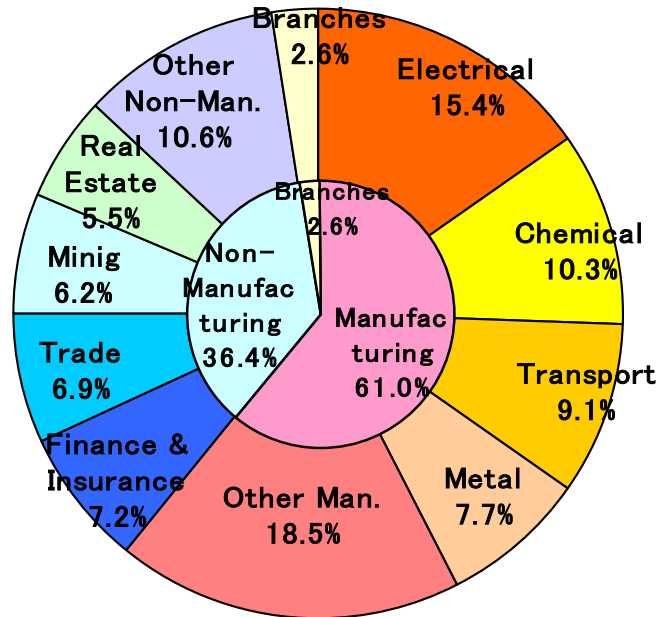

November 2003

Japanese Investment in ASEAN (by sector : 1995-2001 Total)

Japanese Investment to ASEAN is led by the investment of the manufacturing industry.

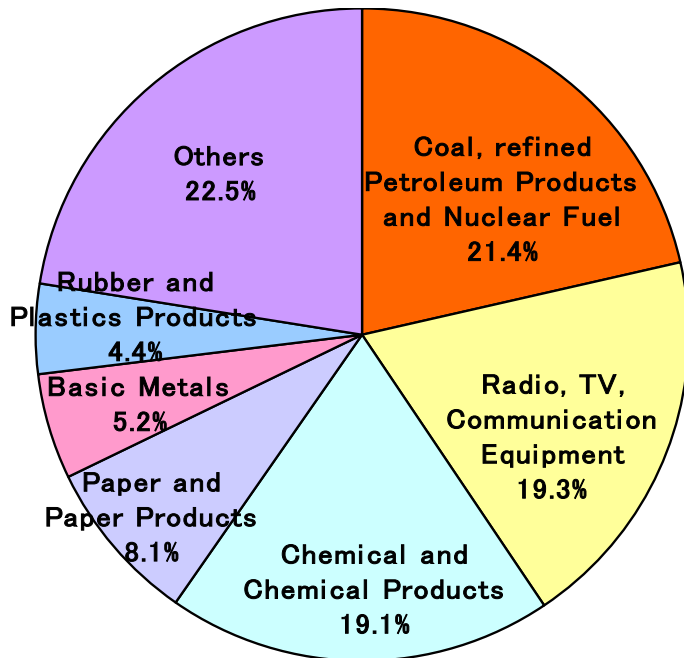

This is in sharp contrast to the trend of world Investment to ASEAN in which coal, refined petroleum products and petrochemical sectors are the dominant sectors.

Japanese investment in the manufacturing sector has contributed to creating stable and ample employment in the ASEAN region.
