List of Potential Fast-Track Projects for the Jabodetabek MPA

1.1 Improvement and expansion of Tanjung Priok Port 1.2 Development of a new international port 2. Upgrading the Industrial Area to the East of Jakarta 2.1 Smart Community (including a pilot project of the "Smart Grid") 2.2 Improvement of road network within the industrial area to the east of Jakarta 3. Mass Transportation Network 3.1 Jakarta Mass Rapid Transit (MRT):S-NI, S-NII, E-W 3.2 Improvement of the Jabodetabek Commuter Railway System 4. Road Network 4.1 Improvement of road network in Jabodetabek Area 5. Airport and Related Infrastructure 5.1 Construction of access railway to the Soekarno-Hatta International Airport 5.2 Expansion of the Soekarno-Hatta International Airport 5.2 Expansion of the Soekarno-Hatta International Airport 5.2 Expansion of the West Java Regional Solid Waste Treatment and Final Disposal 8. Flood Management System 7.1 Construction of East Pump Station at Pluit 9. Electric Power / Energy Infrastructure 9.1 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala				
1.2 Development of a new international port	1.	International Port	1.1	
2. Upgrading the Industrial Area to the East of Jakarta 2.1 Improvement of road network within the industrial area to the east of Jakarta 3. Mass Transportation Network 3.1 Jakarta Mass Rapid Transit (MRT):S-NI, S-NII, E-W 3.2 Improvement of the Jabodetabek Commuter Railway System 4. Road Network 4.1 Improvement of road network in Jabodetabek Area 5. Airport and Related Infrastructure 5. Airport and Related Sewage System 6. Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 9. Construction of East Pump Station at Pluit 9. Electric Power / Energy Interconnection Transmission Line 9. Construction of Banten Coal-fired Power Plant 9. Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9. Development of Rajamandala				
Area to the East of Jakarta 2.2 Improvement of road network within the industrial area to the east of Jakarta 3. Mass Transportation Network 3.1 Jakarta Mass Rapid Transit (MRT):S-NI, S-NII, E-W 3.2 Improvement of the Jabodetabek Commuter Railway System 4.1 Improvement of road network in Jabodetabek Area 5. Airport and Related Infrastructure 5.1 Construction of access railway to the Soekarno-Hatta International Airport 5.2 Expansion of the Soekarno-Hatta International Airport 6. Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.1 Construction of East Pump Station at Pluit 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala			1.2	Development of a new international port
Jakarta 2.2 Improvement of road network within the industrial area to the east of Jakarta 3. Mass Transportation Network 3.1 Jakarta Mass Rapid Transit (MRT):S-NI, S-NII, E-W 3.2 Improvement of the Jabodetabek Commuter Railway System 4. Road Network 4.1 Improvement of road network in Jabodetabek Area 5. Airport and Related Infrastructure 5.1 Construction of access railway to the Soekarno-Hatta International Airport 5.2 Expansion of the Soekarno-Hatta International Airport 6. Water Supply and Sewage System 7. Waste Management System 7.1 Construction of the West Java Regional Solid Waste Treatment and Final Disposal 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.1 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Banten Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala	2.	Upgrading the Industrial	2.1	Smart Community (including a pilot project
industrial area to the east of Jakarta 3. Mass Transportation Network 3.1 Jakarta Mass Rapid Transit (MRT):S-NI, S-NII, E-W 3.2 Improvement of the Jabodetabek Commuter Railway System 4. Road Network 4.1 Improvement of road network in Jabodetabek Area 5. Airport and Related Infrastructure 5.2 Expansion of the Soekarno-Hatta International Airport 6. Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.1 Construction of the West Java Regional Solid Waste Treatment and Final Disposal 8. Reconstruction of East Pump Station at Pluit 9.1 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala		Area to the East of		of the "Smart Grid")
3. Mass Transportation Network 3.1 Jakarta Mass Rapid Transit (MRT):S-NI, S-NII, E-W 3.2 Improvement of the Jabodetabek Commuter Railway System 4. Road Network 4.1 Improvement of road network in Jabodetabek Area 5. Airport and Related Infrastructure 5.1 Construction of access railway to the Soekarno-Hatta International Airport 5.2 Expansion of the Soekarno-Hatta International Airport 6.1 Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 8. Plood Management System 9. Electric Power / Energy Infrastructure 9.1 Construction of Last Pump Station at Pluit 9.2 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala		Jakarta	2.2	Improvement of road network within the
S-NII, E-W 3.2 Improvement of the Jabodetabek Commuter Railway System				industrial area to the east of Jakarta
3.2 Improvement of the Jabodetabek Commuter Railway System 4. Road Network 4.1 Improvement of road network in Jabodetabek Area 5. Airport and Related Infrastructure 5.1 Construction of access railway to the Soekarno-Hatta International Airport 5.2 Expansion of the Soekarno-Hatta International Airport 6. Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.1 Construction of Last Pump Station at Pluit 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala	3.	Mass Transportation	3.1	Jakarta Mass Rapid Transit (MRT):S-NI,
4. Road Network 4.1 Improvement of road network in Jabodetabek Area 5. Airport and Related Infrastructure 5.2 Expansion of the Soekarno-Hatta International Airport 6. Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.2 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Uniit) 9.5 Development of Rajamandala		Network		S-NII, E-W
4. Road Network 4.1 Improvement of road network in Jabodetabek Area 5. Airport and Related Infrastructure 5.1 Construction of access railway to the Soekarno-Hatta International Airport 5.2 Expansion of the Soekarno-Hatta International Airport 6. Water Supply and Sewage System 7. Waste Management System 7.1 Construction of the West Java Regional Solid Waste Treatment and Final Disposal 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.1 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala			3.2	Improvement of the Jabodetabek
5. Airport and Related Infrastructure 5.1 Construction of access railway to the Soekarno-Hatta International Airport 5.2 Expansion of the Soekarno-Hatta International Airport 6. Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 7. Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Banten Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala				Commuter Railway System
5. Airport and Related Infrastructure 5.1 Construction of access railway to the Soekarno-Hatta International Airport 5.2 Expansion of the Soekarno-Hatta International Airport 6. Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 7.1 Construction of the West Java Regional Solid Waste Treatment and Final Disposal 8.1 Reconstruction of East Pump Station at Pluit 9.1 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala	4.	Road Network	4.1	Improvement of road network in
Infrastructure Soekarno-Hatta International Airport 5.2 Expansion of the Soekarno-Hatta International Airport 6. Water Supply and Sewage System 7. Waste Management System 7.1 Construction of the West Java Regional Solid Waste Treatment and Final Disposal 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.1 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala				Jabodetabek Area
5.2 Expansion of the Soekarno-Hatta International Airport 6. Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala	5.	Airport and Related	5.1	Construction of access railway to the
6. Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.2 Construction of Indramayu Coal-fired Power Plant Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala		Infrastructure		Soekarno-Hatta International Airport
6. Water Supply and Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 9. Construction of Jawa-Sumatra Interconnection Transmission Line 9. Construction of Indramayu Coal-fired Power Plant 9. Construction of Banten Coal-fired Power Plant 9. Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9. Development of Rajamandala			5.2	Expansion of the Soekarno-Hatta
Sewage System 7. Waste Management System 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala				International Airport
7. Waste Management System 7.1 Construction of the West Java Regional Solid Waste Treatment and Final Disposal 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.1 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala	6.	Water Supply and	6.1	Water supply project to the Jabodetabek
System 8. Flood Management System 9. Electric Power / Energy Infrastructure 9.2 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala		Sewage System		Metropolitan Area
8. Flood Management System 9. Electric Power / Energy Infrastructure 9.1 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala	7.	Waste Management	7.1	Construction of the West Java Regional
System Pluit 9. Electric Power / Energy Infrastructure 9.1 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala		System		Solid Waste Treatment and Final Disposal
9. Electric Power / Energy Infrastructure 9.1 Construction of Jawa-Sumatra Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala	8.	Flood Management	8.1	Reconstruction of East Pump Station at
Infrastructure Interconnection Transmission Line 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala		System		Pluit
 9.2 Construction of Indramayu Coal-fired Power Plant 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala 	9.	Electric Power / Energy	9.1	Construction of Jawa-Sumatra
9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala		Infrastructure		Interconnection Transmission Line
 9.3 Construction of Banten Coal-fired Power Plant 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala 			9.2	Construction of Indramayu Coal-fired
9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala				Power Plant
 9.4 Development of Gas-fired Power Plant and FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala 			9.3	Construction of Banten Coal-fired Power
FSRU (Floating Storage Regasification Unit) 9.5 Development of Rajamandala				Plant
Unit) 9.5 Development of Rajamandala			9.4	Development of Gas-fired Power Plant and
9.5 Development of Rajamandala				FSRU (Floating Storage Regasification
· · · · · · · · · · · · · · · · · · ·				Unit)
Hydroelectric Power Plant			9.5	Development of Rajamandala
Try arocheotino i ower i lant				Hydroelectric Power Plant
